Knowledge-Based SYSTEMS

Article index

Volume 1

Number 1

RETWALL: An expert system for the selection and preliminary design of earth retaining structures
P. J. Hutchinson, M. A. Rosenman and J. S. Gero 11
Integration of knowledge-based systems with data processing
T. Nomura and S. Lunn 24
Intelligent handling of data by integration of common-sense reasoning
E. T. Keravnou and L. Johnson 32
Toward an expert system for chromosome analysis
Q. Wu, P. Suetens and A. Oosterlinck 43

Number 2

Knowledge engineering in design
V. Akman, P. ten Hagen, J. Rogier and P. Veerkamp 67
Heuristic search and tree systems inference for structural pattern recognition
C. A. Mackenzie 78
Novel approach to a rule-based general purpose program translator using paramodulation
Y. Takefuji and M. Dowell 90
Recursive modal unification for reasoning with knowledge using a graph representation
M. C. Chan, B. J. Garner and E. Tsui 94
Perceptual approach to picture interpretation
S. A. R. Scrivener and A. Schappo 105
Probability problems in knowledge acquisition for expert systems
J. R. Doyle 114

Number 3

Special issue: Alvey IKBS Projects
Socrates: a flexible toolkit for building logic-based expert systems
R. Corlett, N. Davies, R. Khan, H. Reichgelt and F. van Harmelen 132
Knowledge-rich solutions to the binding problem: a simulation of some human computational mechanisms
K. Stenning and J. Levy 143
Expert systems for planning and controlling physical networks in the water industry
K. Ahmad, P. R. Holmes-Higgin, C. P. W. Hornsby and A. J. Langdon 153
Technical overview of the intelligent file store
S. H. Lavington 166
GLIMPSE: a knowledge-based front end for statistical analysis
D. E. Wolstenholme, C. M. O'Brien and J. A. Nelder 173
Knowledge-based approach to requirements engineering using method and domain knowledge
P. Loucopoulos and R. Champion 179
Prolog and deductive databases
M. H. Williams, G. Chen, D. Ferbrache, P. Massey, S. Salvini, H. Taylor and K. F. Wong 188

Number 4

Special issue: Information systems — a knowledge-based perspective
Modelling software processes in a knowledge base: the case of information systems
M. Jarke, M. Jeusfeld and T. Rose 197
Declarative approach to information systems requirements
J. Hagelstein 211
Knowledge-based software assistant
K. M. Benner 221
Information systems development: a rule-based approach
F. Van Assche, P. Layzell, P. Loucopoulos and G. Speltincx 227
MDSE Advisor: knowledge-based techniques applied to software design assessment

PII: S0950-7051(98)00082-3

D. Budgen and M. Marashi 235
Co-operation and communication within an active IPSE
T. Rodden, P. Sawyer and I. Sommerville 240

Number 5

Parallel architectures for AI semantic network processing
J. G. Delgado-Frias and W. R. Moore 259
General purpose inference engine for canonical graph models
B. J. Garner and E. Tsui 266
Knowledge-based system for supporting statistical database management
A. Gabor and G. Barna 279
Concept classifier for knowledge acquisition in frame-based Systems
J. R. Kent, R. C. Thomas and I. S. Torsun 285
Semi-automatic analysis of two-dimensional electrophoretic gels
A. A. van Hoff, T. Niblett, D. G. Rowlands, A. Flook, P. I. Payne and S. McKee 292
Integrated graphical approach to knowledge representation and acquisition
L. Esfahani and J. Kellett 301

Volume 2

Number 1

Special issue: Knowledge-Based Systems in Australasia
Towards knowledge-based identification of mineral mixtures from reflectance spectra
K. Ali, C. Horsfall and R. Lister 5
Data dictionary approach to the maintenance of expert systems: The Knowledge Dictionary
B. Jansen and P. Compton 14
Running rule-based expert systems on parallel processors
T. Li, L. Fang and W. H. Wilson 27
Spatial reasoning with a qualitative representation
A. Blackwell 37
Generating legal arguments
A. L. Tyree, G. Greenleaf and A. Mobray 46
Inductive knowledge acquisition and induction methodologies
W. Buntine 52
Requirements of a reasoning system that supports creative and innovative design activity
S. McLaughlin and J. S. Gero 62
Knowledge-based system design using Prolog: the PIAF experience
M. A. Jabri 72

Number 2

A model of integrated learning
K. Swaminathan 83
Usage and generality of knowledge in the interpretation of diagrams
T. Plant, S. A. R. Scrivener, A. Schappo and A. Woodcock 99
Computation scheme for the general purpose VLSI fuzzy inference engine as expert system
Y. Takefuji and M. -H. Lim 109
Asynchronous production systems
A. Sabharwal, S. S. Iyengar, C. R. Weisbin and F. G. Pin 117
Expert Systems '88: Keynote Lectures
To add AI, or not to add AI?
D. Partridge 128
Processes of knowledge and software
R. Worden 133

Number 3

Normal forms of rule-based knowledge systems
J. K. Debenham 147
DISCON: an expert system for the analysis of differing site conditions claims
Z. M. Kraiem, D. P. Dagli and J. E. Diekmann 158
Towards a generalized model of diagnostic behaviour
E. T. Keravnou and L. Johnson 165
Software machine designed for selection
J. Zucker and A. Demaid 178
Fault detection algorithm for logic programs
A. R. Hamdan and C. J. Hinde 185

Number 4

Integration of Prolog and databases in both evaluational and non-evaluational approaches
T. Imanaka, K. Uehara and J. Toyoda 203
SAIRVO: a planning system implementing the ACTEM concept
M. Lizotte and B. Moulin 210
Implemetation of meronymic (part-whole) inheritance for semantic networks
P. W. Kuczora and S. J. Cosby 219

Framework for building rule-based machine diagnostic expert systems
F. C. Y. Fung 228
Knowledge-based system for rapid prototyping
J. J. P. Tsai and A. Liu 239
Knowledge-based systems in computer-assisted production
K-. P. Fähnrich, G. Groh and M. Thines 249

Volume 3

Number 1

Special section: AI '89 Conference, Prague
A survey of methods used in probabilistic expert systems for knowledge integration
R. Jiroušek 7
Failing of Dempster's combining rule of interval-given probabilities
A. Perez 13
Knowledge-base reconstruction
P. Vysoký 17
Model-preserving transformations of databases for rule-based expert systems with Boolean-valued weights
I. Kramosil 21
Hermeneutics in expert systems
D. Pospelov 25
Nonmonotonic reasoning and logic programming
P. Jirků 28
Knowledge represented by mathematical models for fault diagnosis in chemical processing units
J. Lutcha and J. Zejda 32
Computer-aided creativity in the arts
Music composition as hypothesis formation: a blackboard concept of musical creativity
O. E. Laske 36
Computers, choreography and creativity
P. Brightman 42
Mapping rule-based systems into neural architecture
L. M. Fu and L. C. Fu 48

Number 2

Using errors to direct design
P. A. Booth 67
Knowledge acquisition mechanisms for a logical knowledge base including hypotheses
M. Ishizuka and T. Matsuda 77
Argument representation for editorial text
S. J. Alvarado, M. G. Dyer and M. Flowers 87
Designing deontic knowledge bases from regulation texts
B. Moulin and D. Rousseau 108

Number 3

A knowledge-based approach for checking software information using a non-monotonic reasoning system
J. J-. P. Tsai and T. Weigert 131
Argument comprehension and retrieval for editorial text
S. J. Alvarado, M. G. Dyer and M. Flowers 139
Propa: a papaya management expert system
S. Y. Itoga, C. L. Chia, R. S. Yost and R. F. L. Mau 163
Systems development life-cycle for expert systems
R. Agarwal and M. Tanniru 170

Number 4

Knowledge-support systems
B. R. Gaines 192
Framework of knowledge-based systems - multiple meta-level architecture for representing problems and problem-solving processes
S. Ohsuga 204
Advanced knowledge-base environments for large database systems
E. Laenens and D. Vermeir 215
An architecture for knowledge-based front ends
E. Edmonds and E. McDaid 221
Back-end manager: an interface between a knowledge-based front end and its application subsystems
A. Prat, J. Lores, P. Fletcher and J. M. Catot 225
Grouping knowledge-base data into distributable clusters
P. O. Bobbie 230
Goal-driven blackboard control architecture based on extending partially complete general goal trees
S. Kuru and F. Bek 236
Logic of design actions
R. Coyne 242

Volume 4

Number 1

Special section: Knowledge-based software tools from the USSR
Knowleage-based programming environments
E. Tyugu 4

C-Priz — a new generation software tool for small computers
B. Volozh and M. Rosenfeld 16
ExpertPriz — an integrated expert system shell
M. Koov and H. Perkmann 27
Frame-based implementation of a design knowledge-capture scheme
J. A. Herndon, M. Anjanappa, D. K. Anand and J. A. Kirk 35
Towards a fuzzy logic programming system: a fuzzy propositional logic
P. C. Rhodes and S. M. Menani 52

Number 2

Reappraisal of the use of conditional probability in early expert systems
P. C. Rhodes and G. R. Garside 67
Strategies for mixed reasoning with a graph-based reasoning engine
B. J. Garner and E. Tsui 75
Rule by example: an example-based approach to knowledge-base management
L. V. Orman 82
Model-theoretic approach to clustering
V. Sridhar and M. Narasimha Murty 87
Knowledge-based system for material selection for design with new materials
H-. J. Bullinger, J. Warschat and D. Fischer 95
Logic-based approach to expert systems in chemistry
T. Akutsu, B. Suzuki and S. Ohsuga 103

Number 3

Assembly sequence planning using case-based reasoning techniques
P. Pu and M. Reschberger 123
DEXT: an integrated knowledge-engineering environment for control-engineering applications
A. Basu, A. K. Majumdar and S. Sinha 131
Knowledge-based approach to Petri nets analysis
M. Benmaiza and M. R. Elkaraksy 144
Rule-based algorithms for geographic constraints in a marine knowledge-based system
F. Coenen and P. Smeaton 157
Application of an expert system to monitoring and control in aquaculture
D. D. Harris, Feng Zhang and P. H. Sydenham 165
Integrating expert systems and decision-support systems: principles and practice
A. Bonarini and V. Maniezzo 172
Argument-based explanation of logic programs
T. J. M. Bench-Capon, D. Lowes and A. M. McEnery 177

Number 4

Rigorous approach to the development of knowledge-based systems
R. T. Plant 186
Representing temporal knowledge in conceptual graphs
B. Moulin and D. Côté 197
Knowledge-based image management system
K. S. Rao and B. E. Prasad 209
Limited-resource scheduling by generalized rule-based system
A. Meisels, T. Kuflik and E. Gudes 215
Some knowledge-acquisition methods for Prospector-like systems
V. Mahi and Z. Kouba 225
Automatic refinement of knowledge bases with fuzzy rules
K. S. Leung and M. L. Wong 231

Volume 5

Number 1

Designing as reflective conversation with the materials of a design situation
D. A. Schön 3
Beyond the macho approach of artificial intelligence: empower human designers — do not replace them
G. Fischer and K. Nakakoji 15
Development of a knowledge-based design support system
T. Smithers, M. X. Tang, N. Tomes, P. Buck, B. Clarke, G. Lloyd, K. Poulter, C. Floyd and E. Hodgkin 31
ICADS expert design advisor: an aid to reflective thinking
L. Myers and J. Pohl 41
Opportunistic software architecture for support of design coordination
K. J. MacCallum and I. M. Carter 55
Impact of connectionist systems on design
S. Newton and R. D. Coyne 66
Effects of examples on the results of a design activity
A. T. Purcell and J. S. Gero 82
Designers' activities examined at three levels: organization, strategies and problem-solving processes
W. Visser 92

Number 2

Towards a fuzzy-iogic programming system: a 1st-order fuzzy logic
P. C. Rhodes and S. M. Menani 106
Detection of semantically incorrect rules in knowledge-based systems
L-. M. Fu 117
AGENTS: object-oriented Prolog system for cooperating knowledge-based systems
G. Q. Huang and J. A. Brandon 125
Empirical study of expert system development
A. D. Preece and L. Moseley 137
Expert systems in manufacturing. Part 1: A users' perspective on expert-systems innovation
P. Holden 149
Multilevel manufacturing knowledge in an AI-based modelling system for the design of flexible machining cells
W. Wang and R. Bell 158

Number 3

Special issue: Conceptual graphs
Guest Editor: John Sowa
Logical structures in the lexicon
J. F. Sowa 173
Conceptual-graph approach for the representation of temporal information in discourse
B. Moulin 183
Conceptual and semantic structures
P. Kocura 193
Lexical choice as pattern matching
J-. F. Nogier and M. Zock 200
Integration of conceptual graphs and government-binding theory
M. L. McHale and S. H. Myaeng 213
Metaphor as a mechanism for reorganizing the type hierarchy
E. C. Way 223
Multilevel hierarchical retrieval
R. Levinson and G. Ellis 233
Can a large knowledge base be built by importing and unifying diverse knowledge?: lessons from scruffy work
G. Berg-Cross 245

Number 4

Expert systems in manufacturing. Part 2: A management framework for expert-systems innovation and technology transfer
P. Holden 258
Integrated approach to knowledge-based process-plan generation
G. H. Abdou 269
Use of genetic algorithms in training diagnostic rules for process fault diagnosis
J. Zhang and P. D. Roberts 277
Set-theoretic equation solver based on a truth-maintained architecture
C. J. Hinde and M. Norman 289
Framework for modeling and analysis of distributed problem solving systems
G. Uma, B. E. Prasad and P. G. Reddy 295

Volume 6

Number 1

Special issue: Knowledge-based interaction
From scientific computation to decision support
H. J. van Zuylen 3
Using the FOCUS architecture for developing knowledge-based front ends: a KBFE for forecasting
A. Prat, M. Catot, P. Fletcher, J. Lores and R. Southwick 11
Can complex conventional programs be revitalized?
J. Henspens and P. Letanoux 17
Design of an intelligent interface to standard PC applications which maximises the ability of the disabled user
J. A. Hewitt and P. G. R. Halford 24
Knowledge-based system requirements
R. M. Jones, L. Candy and E. A. Edmonds 31
How can knowledge-based systems solve large-scale problems?: model-based decomposition and problem solving
S. Ohsuga 38

Number 2

Plans in natural-language dialogues
B. Chaib-draa 67
Distributed intelligent systems: issues, perspectives and approaches
G. Uma, B. F Prasad and O. N. Kumari 77
Efficient hypothetical reasoning system for predicate-logic knowledge base
A. Kondo, T. Makino and M. Ishizuka 87
Multiple context planning within a truth-maintenance system

A. D. Bray, C. J. Hinde, P. J. Herbert, D. M. Temple and D. Round 95
Reasoning by coordination: an integration of case-based and rule-based reasoning systems
R. T. H. Chi and M. Y. Kiang 103
Knowledge-based system for computer-aided drug design
E. Suzuki, T. Akutsu and S. Ohsuga 114

Number 3

Feature extraction and validation within a flexible manufacturing protocol
B. Kumar, D. K. Anand, M. Anjanappa and J. A. Kirk 130
Towards competent information acquisition interactions between an expert system and its user
E. T. Keravnou, J. Washbrook and F. Dams 141
FEATS: knowledge representation and processing issues
A. Bykat 157
Knowledge-based approach to structural integrity verification in requirements analysis and logical system specification
R. Agarwal, S. Sakthivel and M. Tanniru 165
Reachability trees for Petri nets: a heuristic approach
C. Uma and B. E. Prasad 174

Number 4

Special Issue: Intelligent user interfaces
Guest Editors: W. E. Hefley, Carnegie Mellon University, USA
D. Murray, University of Surrey, UK
Price of flexibility in intelligent interfaces
D. D. Woods 189
Adaptive systems: from intelligent tutoring to autonomous agents
D. Benyon and D. Murray 197
From user interface design to the support of intelligent and adaptive interfaces: an overhaul of user interface software infrastructure
P. Sukaviriya 220
Design, implementation and evaluation of an adaptive user interface
C. G. Thomas 230
User-centered approach to adaptive interfaces
T. Kühme 239
Cognitive task analysis and interface design in a technical troubleshooting domain
L. S. Steinberg and D. H. Gitomer 249
Wizard of Oz studies why and how
N. Dahlbäck, A. Jönsson and L. Ahrenberg 258
Towards automatic evaluation of multimodal user interfaces
J. Coutaz, D. Salber and S. Balbo 267

Volume 7

Number 1

Development of a generalized knowledge source structure for blackboard systems
C. S. Ho and C. H. Keng 5
Diagnostic expert system inference engine based on the certainty factors model
S. Tzafestas, L. Palios and F. Cholin 17
Feasibility study and impact assessment for a knowledge-based information-technology planning system
G. I. Doukidis and G. I. Karakoulas 27
Expert system for evaluating product liability claims
W. Raghupathi, L. I. Schkade and K. Harbison-Briggs 37
Structuring and modules for knowledge bases: motivation for a new model
G. Antoniou and I. Wachsmuth 49
Knowledge engineering as cross-examination
J. S. Fulda 52

Number 2

Strategy for integrating object-oriented and logic programming
R. Bose 66
Multi-agent conflict resolution: a computational framework for an intelligent argumentation program
J. A. A. Sillince 75
MAKRS: a knowledge and belief representation system for multiple agents
Y. H. Kim, S. R. Maeng and J. W. Cho 91
Knowledge-based clustering approach for data abstraction
V. Sridhar and M. Narasimha Murty 103
Multi-paradigm software environment for the real-time processing of sound, music and multimedia
A. Camurri, C. Innocenti and C. Massucco 114
MIDAS: an application of model-based reasoning for the diagnosis of hydraulic systems
N. F. Doherty and A. K. Kochhar 127

Integration of scientific data and formulae in an object-oriented knowledge-based system
M. V. Krishnamurthy and F. J. Smith 135
Evolving prototype control rules for a dynamic system
T. C. Fogarty and R. Huang 142

Number 3

Knowledge representation form in mechanical engineering
R. Bello, D. Gálvez G. Sánchez, M. M. García and G. Benavides 154
Knowledge representation for preliminary stages of engineering tasks
I. F. C. Smith and S. Boulanger 161
Parallel search-and-learn technique for solving large scale travelling-salesperson problems
C. P. Ravikumar 169
DyKOr: a method for generating the content of explanations in knowledge systems
A. Lopez-Suarez and M. Kamel 177
Speedup of hypothetical reasoning by experience-based learningmechanism
T. Makino and M. Ishizuka 189
Building an interactive blackboard framework 4
M. Sunners, D. Dawson and P. Sydenham 199
Interpretation of neural networks as Boolean transfer functions
G. P. Fletcher and C. J. Hinde 207

Number 4

Turning breakdowns into opportunities for creativity
G. Fischer 221
Method to assist the building and expression of subjective concepts and its application to design problems
M. Sugimoto, K. Hori and S. Ohsuga 233
Programmable applications for the arts: computational tools for hand, eye and mind
M. Eisenberg 239
Interactive multimedia — creative catalyst or constraint?
N. Flint and J. Sparrow 247
Designing for radical tailorability: coupling artifact and rationale
A. I. Mørch 253
Negotiation in collaborative activity: a discourse analysis
C. L. Sidner 265
Negotiation in collaborative activity: an implementation experiment
C. Rich 268
Work-oriented development of knowledge-based systems: a case for multiple perspectives
M. Stolze 271
Representing discourse for collaborative interactive generation
S. M. Haller 274
Maximally efficient dialogue mode algorithm
C. I. Guinn 277
Impact of variable initiative on a natural language dialog system
R. W. Smith 279

Volume 8

Number 1

Context interchange: a lattice based approach
M. P. Peddy and A. Gupta 5
Model for exploiting associative matching in AI production systems
N. K. Kasacov, S. H. Lavington. S. Lin and C. Wang 14
Hybrid knowledge-based architecture for building an intelligent nondestructive signal inspection system
S. J. Kang and Y. R. Kwon 21
Case-based reasoning for AIDS initial assessment
L. D. Xu 32
Cooperating knowledge-based systems for environmental decision support
N. M. Avouris 39
Knowledge-based cabin crew pattern generator
L. -F. Kwok, S. -L. Hung and C. -C. Pun 55

Number 2/3

Overview of human-computer collaboration
L. G. Terveen 67
Structuring collaborative information-seeking dialogues
A. Stein and E. Maier 82
Intertwining knowledge delivery and elicitation: a process model for human-computer collaboration in design
K. Nakakoji and G. Fischer 94
Testing collaborative strategies by computational simulation: cognitive and task effects
M. A. Walker 105
Cognitive cooperation through visual interaction
E. Rogers 117

Misunderstanding and the negotiation of meaning using abduction
S. W. McRoy 126
Embedding languages within design environments
M. Eisenberg 135
Interaction and feedback in a spoken language system: a theoretical framework
S. E. Brennan and E. A. Hulteen 143

Number 4

Graph reduction implementation of a production system
S. Murrell and R. Plant 155
Expert system approach to electroencephalogram signal processing
M. T. Hellyar, E. C. Ifeachor, D. J. Mapps, E. M. Allen and N. R. Hudson 164
Towards a fuzzy logic programming system: a clausal form fuzzy logic
P.C. Rhodes and S. Merad-Menani 174
Using neural networks as a tool for constructing rule based systems
G. P. Fletcher and C. J. Hinde 183
Learning word syntactic subcategorizations interactively
F. Gómez 190
Advanced binary encoded matrix representation for rule base verification
F. Coenen 201
A way of designing knowledge based systems
S. Ohsuga 211
Knowledge acquisition for medical diagnosis systems
A. Armoni 223

Number 5

Problem solving strategies for open information systems
R. Kaula 235
Use of maximum entropy method as a methodology for probabilistic reasoning
P.C. Rhodes and G. R. Garside 249
Constructive knowledge engineering
M. J. Elliot, H. T. Bull, C. I. Pulford, N. R. Shadbolt and W. Smith 259
Towards quality control for knowledge-based systems development
R. Clarke and H. Soltan 269
Extensible organization of property descriptions in object modelling for engineering design
J. Zucker and A. Demaid 279

Number 6

Introduction to knowledge-based neural networks
L. Fu 299
Dynamically adding symbolically meaningful nodes to knowledge-based neural networks
D. W. Opitz and J. W. Shaylik 301
Recurrent neural networks and prior knowledge for sequence processing: a constrained nondeterministic approach
P. Frasconi, M. Gori and G. Soda 313
Initialization of neural networks by means of decision trees
I. Ivanova and M. Kubat 333
Extension of the temporal syrnchrony approach to dynamic variable binding in a connectionist inference system
N. S. Park, D. Robertson and K. Stenning 345
Hybrid modeling in pattem recognition and control
J. C. Bezdek 359
Survey and critique of techniques for extracting rules from trained artificial neural networks
R. Andrews, J. Diederich and A. B. Tickle 373

Volume 9

Number 1

Parallel search-and-learn techniques and graph coloring
C. P. Ravikumar and R. Aggarwal 9
Review of restoration strategies and a realtime knowledge based approach for bulk power system restoration
C. Y. Teo, W. Jiang and H. B. Gooi 15
Explaining design plans
D. T. Ndumu, B. A. Izzuddin and D. Lloyd Smith 23
Knowledge modelling for constructing an expert system to support reforestation decisions
C. W. Chan and M. Johnston 41
Letters
Knowledge based method for building a software system configuration
M. Bieliková and P. Návrat 61
Dimensionality reduction via discretization
H. Liu and R. Setiono 67

Number 2

Special Issue: Models and techniques for reuse of designs

Guest Editors: P. M. Wognum and I. F. C. Smith
Current status of case-retrieval in engineering domains: an analysis from the knowledge engineering perspective
F. Maurer 83
Redesign of technical systems
S. J. M. van Eldonk, L. K. Alberts, R. R. Bakker, F. Dikker and P. M. Wognum 93
Redesign and reuse in compositional knowledge-based systems
F. M. T. Brazier, P. H. G. van Langen, J. Treur and N. J. E. Wijngaards 105
Reusability of simulation models
A. Pos, P. Borst, J. Top and H. Akkermans 119
Using adaptation knowledge to retrieve and adapt design cases
B. Smyth and M.T. Keane 127
Controlling functional fixedness: the essence of successful reuse
L. Dusink and L. Latour 137

Number 3

Design by interactive exploration using memory-based techniques
A. Gómez de Silva Garza and M. L. Maher 151
Efficient inference method for computing an optimal solution in predicate-logic hypothetical reasoning
A. Kondo and M. Ishizuka 163
Temporal constraint reasoning mechanisms for microprocessor systems diagnosis
S. M. Yuen and K. P. Lam 173
NODES: a numerical and object based modelling system for conceptual engineering design
A. H. B. Duffy, A. Persidis and K. J. MacCalium 182
Framework for knowledge based support in a concurrent engineering environment
J. V. Harrington, H. Soltan and M. Forskitt 207

Number 4

Dynamic route planning with uncertain information
F. Golshani, E. Cortes-Rello and T. H. Howell 223
Enhancing the blackboard concept to produce a flexible, extensible knowledge-based design tool
J. G. Harvey and D. D. Harris 233
Cooperative software agents for the Unix domain
A. Poggi 245
Integrating machine learning with knowledge acquisition through direct interaction with domain experts
G. I. Webb 253
System for managing and refining structural characteristics discovered from databases
N. Zhong and S. Ohsuga 267

Number 5

Temporal reasonin using tesseral addressing: towards an intelligent environmental impact assessment system
F. Coenen, B. Beattie, B. Dias, T. J. M. Bench-Capon and M. J. R. Shave 287
Integrity and rule checking in nonmonotonic knowledge bases
G. Antoniou 301
Knowledge-based systems in the design of a new parcelling
A. M. Buis and R. A. Vingerhoeds 307
Computing marginal probabilities in causal multiway trees given incomplete information
G. R. Garside and P. C. Rhodes 315
APACS; a multi-agent system with repository support
H. Wang and C. Wang 329
Letter
Knowledge based metaphor interpretation
V. Varma and A. S. Reddy 339

Number 6

Special Issue: Creativity and Cognition 1996
Guest Editor: L. Candy
Participatory theater: interacting with autonomous tools for creative applications
J. Ambach and A. Reppening 351
The creative process of animating human movement
A. Bruderlin 359
A system to visualize viewpoints for supporting researchers' creativity
M. Sugimoto, K. Hori and S. Ohsuga 369
Toward an outsider agent for supporting a brainstorming session — an information retrieval method from a different viewpoint
K. Nishimoto, Y. Sumi and K. Mase 377
Making AI systems more creative: the IPC-model
K. Schmid 385

Number 7

Armchair missions to Mars: using case-based reason-

ing and fuzzy logic to simulate a time series model of astronaut crews
G. Stahl 409
Integrating multiple and diverse abstract knowledge types in real-time embedded systems
A. Harrison and P. G. Thomas 417
Creativity, emergence and evolution in design
J. S. Gero 435
A bibliographical survey of constraint-based approaches to CAD, graphics, layout, visualization, and related topics
W. Hower and W. H. Graf 449
A model and its different applications to case-based reasoning
M. M. García Lorenzo and R. E. Bello Pérez 465

Number 8

Special issue: Knowledge Aquisition Representation and Processing 1995
Guest Editor: B. J. Garner
Analogic: Inference beyond logic
K. K. Thornber 483
Conceptual indexing and active retrieval of video for interactive learning environments
R. Burke 491
Heterogeneous knowledge representation: integrating connectionist and symbolic computation
D. Montesi 501
Design and application of a new knowledge engineering tool for solving real-world problems
Z.S. Hippe 509
Automated object-oriented reusable component identification
L. H. Etzkorn and C. G. Davis 517
A system for simulation, monitoring and diagnosis of controlled continuous processes with slow dynamics
J. Prang, H. -D. Huemmer and W. Geisselhardt 525
A rule-based machine vision system for fire detection in aircraft dry bays and engine compartments
S. Y. Foo 531

Volume 10

Number 1

Computers and creativity support: knowledge, visualisation and collaboration
L. Candy 3
Abduction Machine-1 wooden furniture
A. Kubota 15
Computattional environments supporting creativity in the context of lifelong learning and design
G. Fischer and K. Nakakoji 21
Concept space connected to knowledge processing for supporting creative design
K. Hori 29
An idea generation support system for industrial designers (idea sketch processor)
H. Noguchi 37
KJ editor: a card-handling tool for creative work support
H. Ohiwa, N. Takeda, K. Kawai and A. Shiomi 43
Emergent media environment for idea creation support
K. Sugiyama, K. Misue, I. Watanabe, K. Nitta and Y. Takada 51
Consensus-making support system for creative problem solving
N. Kato and S. Kunifuji 59

Number 2

Logic-based representation and reasoning about knowledge of constrained resources
Y. U. Ryu 71
An analysis on the inference guiding strategies — The benefits and costs
J. Wang 81
Situation assessment and prediction in intelligence domains
L. A. Jesse and J. K. Kalita 87
An integrated knowledge-based system for urban planning decision support
F. Shan and L. D. Xu 103
A framework of constraint-based modeling for cooperative decision systems
H. Wang and L. Liao 111
Design knowledge representation and control for the structural design of ships
Y. S. Yeun and Y. S. Yang 121
Heterogeneous knowledge representation integrating connectionist and symbolic computation
D. Montesi 133

Number 3

Knowledge processing and commonsense
R. Narasimhan 147

Combining case-based reasoning and statistical method for proposing solution in RICAD
J. Daengdej, D. Lukose, B. Tsui, P. Beinat, L. Prophet 153
Building software agents for training systems: A case study on radiotherapy treatment planning
A. Farias, T. N. Arvanitis 161
PIPES: A heuristic search model for pipeline schedule generation
M. Sasikumar, P. Ravi Prakash, S. M. Patil, S. Ramani 169
Layered fractal neural net: computational performance as a classifier
B. Chakraborty, Y. Sawada, G. Chakraborty 177
Automatic induction of rules for text simplification
R. Chandrasekar, B. Srinivas 183

Number 4

Generating complex systems in the domain of chemical reactions
M. L. Mavrovouniotis, S. E. Prickett 199
Computing marginal probabilities in causal inverted binary trees given incomplete information
P. C. Rhodes, G. R. Garside 213
A rule-based reactive model for the simulation of aircraft on airport gates
Y. Cheng 225
A representation of complex events and processes for the acquisition of knowledge from texts
F. Gomez 237
Letter
Successes and failures of KBSs in real-world applications: Report on the International Conference
P. Brézillon 253

Number 5

A special issue on Intellignet User Interfaces
Guest Editor: Angel R. Puerta, Stanford University, USA
Interaction with a mixed-initiative system for exploratory data analysis
R. St. Amant and P. R. Cohen 265
Efficiently planning coherent visual discourse
M. X. Zhou and S. K. Feiner 275
Methods to describe and recognize sign language based on gesture components represented by symbols and numerical values
H. Sagawa, M. Takeuchi and M. Ohki 287
Multimodal user interfaces in the Open Agent Architecture
D. B. Moran, A. J. Cheyer, L. E. Julia, D. L. Martin and S. Park 295
The Selection Recognition Agent: instant access to relevant information and operations
M. S. Pandit and S. Kalbag 305
Evaluating the utility and usability of an adaptive hypermedia system
K. Höök 311

Number 6

Extending electronic coordination mechanisms using argumentation: the case of task allocation
J. A. A. Sillince 325
Characteristics of an effective design plan system to support reuse in case-based mechanical design
Y. Gao, I. Zeid and T. Bardasz 337
Towards an object-oriented logic framework for knowledge based systems
D. Xu 351
Finding relevant knowledge in a knowledge base of linear logic
D. -T. Lee and C. P. Tsang 359
Toward truly intelligent information systems — from expert systems to automatic programming
S. Ohsuga 363

Number 7

Special Issue, KDD: Techniques & Applications
Guest Editors:Hing-Yan Lee, Kent Ridge Digital Labs, Singapore
Hongjun Lu, National University of Singapore, Singapore
Hiroshi Motoda, Osaka University, Japan
Discovery of first-principle equations based on scale-type-based and data-driven reasoning
T. Washio and H. Motoda 403
Knowledge discovery from numerical data
C. Morita and H. Tsukimoto 413
Constructing conjunctions using systematic search on decision trees
Z. Zheng 421
Knowledge representation and discovery based on linguistic atoms
D. Li, J. Han, X. Shi, M. C. Chang 431
Epsilon focusing — A strategy for active example selection
P. Niyogi and K. -K. Sung 441
A Data Mining methodology for cross-sales
S. S. Anand, A. R. Patrick, J. G. Hughes and D. A. Bell 449
Discovering user access patterns on the World Wide Web
D. W. Cheung, B. Kao and J. Lee 463

KEYWORD INDEX

Knowledge-Based Systems, volumes 1–10

Keyword index

Abduction
Core language, Dialogue **8,** 126
Abduction
Design, Image schema, Cognitive semantics **10,** 15
Abstract knowledge types
Blackboard architecture, Software engineering principles, Ada, Real-time embedded system, Knowledge-based techniques, Knowledge-based components **9,** 417
Abstraction mechanism
Specification, Selection, Engineering design, Knowledge representation, Taxonomic reasoning, Property inheritance, Object orientation, Messaging, Truth maintenance, Consistency maintenance, Inheritance graph, (Symbolic) description **2,** 178
Accuracy
Knowledge acquisition, Consistency, Medical diagnosis, Knowledge bases **8,** 223
Active example selection
Example-based learning, Face detection, Epsilon-focusing **10,** 441
Ada
Real-time embedded system, Knowledge-based techniques, Knowledge-based components, Abstract knowledge types, Blackboard architecture, Software engineering principles **9,** 417
Adaptation
Software design, Case-based reasoning, Retrieval **9,** 127
Adaptive hypermedia
Intelligent interfaces, Usability **10,** 311
Adaptive interfaces
Human-computer interaction, Intelligent systems **6,** 189
Intelligent interfaces, User models **6,** 197
User interface, User models **6,** 220
Customizability, Usage profiles **6,** 230
Intelligent user interfaces, User models **6,** 239
Agent
Object-oriented interface, Selection, Recognition **10,** 305
Agent architectures
Software agents, Multiagent systems **9,** 245
Agents
Speech, Dialog, Feedback, Repair, Telephony **8,** 143
Agentsheets
Direct-manipulation, Delegation, Participatory theater **9,** 351
AI and music
Multimedia knowledge representation, Hybrid systems **7,** 114
Airport apron control
Simulation, Network-based model **10,** 225
Algorithms
Geographic information systems, Navigation, Quadtrees **4,** 157
ALICE system
Parallel processing, Graph reduction, Production systems **8,** 155
Analysis
Colored tokens, Cumulative places, Deadlocks, Distributed intelligent systems, DIPS Petri net, Inhibition arcs, Matrix equations, Non-primitive places and transitions, Place invariants, Reachability trees (analysis), Scientific-community metaphors **5,** 295
APES
Evaluator, Knowledge-based front end, Knowledge base, Logic programming, Statistical analysis, GLIM: Prolog **1,** 173
Applications
Programmable design environments, Complexity **8,** 135
Apprenticeship learning
Knowledge acquisition, Machine learning **9,** 253
Architecture
Building methodology, Expert systems, Toolkit **1,** 132
Expert system, Rule-based machine diagnosis **2,** 228
Cooperation, Context, Knowledge-based systems **10,** 253
Argument representation
Editorial comprehension, Knowledge-based systems **3,** 87

PII: S0950-7051(98)00084-7

Argument representations
Editorial comprehension, Knowledge-based systems **3,** 139
Arguments
Rule-based programs, Logic programming, Knowledge-based systems, Explanation **4,** 177
Artificial intelligence
Deduction and theorem proving, Knowledge representation formalisms and methods, Computer-aided engineering and design, Languages, Non-standard logics, Object-oriented programming, Naive physics, Extensional/intensional descriptions **1,** 67
Design, Classification, Data management, Metaphor, Connectionism **5,** 66
Design, Organization, Planning, Strategies, Problem-solving processes, Cognitive psychology, Assistance systems **5,** 92
Blackboard Systems, Knowledge representation **7,** 5
Object-oriented programming, Logic programming **7,** 66
Urban planning, Knowledge-based systems, Decision support systems **10,** 103
Logic programming, Integration **9,** 501, **10,** 133
Artificial neural networks
Software development, Enabling technologies, Knowledge-based programming **1,** 221
Knowledge-oriented systems, Semantic networks, Parallel computers **1,** 259
Knowledge-based system, Semi-automatic analysis **1,** 292
Knowledge representation, Planning system, Temporal planning, Autonomous agent **2,** 210
Software engineering, Rapid prototyping, Frames, Knowledge-based software system **2,** 239
Fractal, Pattern classifier **10,** 177
Planning, Data exploration **10,** 265
Assembly sequence planning
Case-based reasoning, Constraint-oriented design **4,** 123
Assessment
MDSE advisor, Software tools, Knowledge-based techniques, Software design **1,** 235
Assistance systems
Artificial intelligence, Design, Organization, Planning, Strategies, Problem-solving processes, Cognitive psychology **5,** 92
Association abstraction
Classification abstraction, Clustering **7,** 103
Associative matching
Production systems, Content-addressable memory **8,** 14
Associative memory
Declarative languages, Semantic networks, Knowledge-based systems, Knowledge representation, Knowledge manipulation engines, Intelligent file stores **1,** 166
Associative pattern retrieval
Conceptual graphs, Generalization hierarchies, Graph matching **5,** 233
Assumption management
Engineering modelling, Reusability, Model fragment libraries **9,** 119
Attributes
Characteristics, Existence, Thematic-relations hypothesis, Conceptual graphs, Semantic structures, Deep knowledge, Natural types, Role types **5,** 193
Automated graphics generation
Knowledge-based user interfaces, Top-down hierarchical planning **10,** 275
Automated program synthesis
Computational modes, Expert knowledge, Dialogue scenarios, Graphical interface, Conceptual programming **4,** 16
Automated reasoning
Knowledge-based software systems, Knowledge representation, Non-monotonic logic **3,** 131
Automatic system generation
Intelligent information systems, Multi-strata model **10,** 363
Autonomous agent
Artificial intelligence, Knowledge representation, Planning system, Temporal planning **2,** 210
Autonomous mobile robots
Real-time expert systems, Production systems, Rete network, Multi-processor architectures, Distributed expert systems **2,** 117
Back propagation
Conceptual networks **5,** 117
Back-end manager
User interface, Knowledge-based front-end, Interface separability **3,** 225
Backtracking
Knowledge-based system, Very Large Scale Integration, Computer Aided Design, Prolog, Optimization, Current Context Memory **2,** 72
Rule base, Inference machine, Frames, Slots **4,** 131
Backtracking strategy
Prolog, Rule-based systems, Resource allocation, Expert systems, Scheduling **4,** 215

Backward-chaining
Expert system, Knowledge-based system, Blackboard system, Control architecture, Goal-driven search **3,** 236
Bayes' theorem
Conditional probability, Belief networks, Uncertainty, Reasoning **4,** 67
Behavioural modelling
Rule based diagnosis, Event-driven simulation, Process monitoring **9,** 525
Belief networks
Uncertainty, Reasoning, Bayes' theorem, Conditional probability **4,** 67
Bibliographical survey
Constraint processing, Layout, Knowledge-based design systems **9,** 449
Binary encoded incidence matrices
Rule base verification **8,** 201
Binary relations
Channel matrix, Entropy, Nodes, Knowledge base **3,** 17
Binding
Memory, PDP system, Knowledge-rich, Human memory, Representations **1,** 143
Blackboard architecture
Prolog, Measurement systems **9,** 233
Software engineering principles, Ada, Real-time embedded system, Knowledge-based techniques, Knowledge-based components, Abstract knowledge types **9,** 417
Blackboard control
Design support, Pharmaceutical drugs, System architecture, Design exploration, Reason maintenance **5,** 31
Blackboard paradigm
Cognitive musicology, Composition theory, Musical creativity **3,** 36
Blackboard system
Control architecture, Goal-driven search, Backward-chaining, Expert system, Knowledge-based system **3,** 236
Blackboard systems
Artificial intelligence, Knowledge representation **7,** 5 Graphical user interfaces **7,** 199
Blackboards
Cooperative computing, Multiexpert systems, Knowledge-based design, Expert design advisors, CAD **5,** 41
Intelligent design assistance, Design coordination **5,** 55
Boolean algebra
Transformations, Expert systems, Databases, Data **3,** 21
Brewing
Knowledge engineering, Knowledge acquisition **8,** 259
Building methodology
Expert systems, Toolkit, Architecture **1,** 132
Bulk power systems restoration
Restoration strategies **9,** 15
Bulletin boards
Crop management, Papaya, Hawaii, Management expert system, System design **3,** 163
Cabin crew planning
Hybrid knowledge representation **8,** 55
CAD
Blackboards, Cooperative computing, Multiexpert systems, Knowledge-based design, Expert design advisors **5,** 41
Candidate Elimination algorithm
Empirical/analytical/integrated learning, Negative Instance Elimination algorithm **2,** 83
Canonical graphs
Reasoning, Rule-based systems, Knowledge representation, Inference techniques **1,** 266
Care-based reasoning
Indexing, Multimedia, Intelligent tutoring systems **9,** 491
Case retrieval
Knowledge engineering **9,** 83
Case-based reasoning
Constraint-oriented design, Assembly sequence planning **4,** 123
Rule-based reasoning, Cooperative reasoning **6,** 103
Fuzzy set theory, Health care **8,** 32
Retrieval, Adaptation, Software design **9,** 127
Statistical modeling, Simulation **9,** 409
Neural nets, Function of similarity **9,** 465
Central limit theorem **10,** 153
Mechanical design, Design plan systems, Design procedure, Design rationale **10,** 337
Causal models
Process constraints, Knowledge fault diagnosis, Chemical processing industry, Expert systems, Empirical knowledge **3,** 32
Causal networks
Maximum Entropy, Reasoning under uncertainty, Incomplete information, Probability **10,** 213
Incomplete information, Maximum entropy **9,** 315
Central limit theorem
Case-based reasoning **10,** 153
Certainty factor models
Diagnostic expert systems, Probabilistic models **7,** 17

Certainty factors
System validation, Expert system, Construction claims, Knowledge acquisition, Knowledge representation **2,** 158
Channel matrix
Entropy, Nodes, Knowledge base, Binary relations **3,** 17
Characteristic rule discovery
Deviation detection, Cross-sales, Data Mining **10,** 449
Characteristics
Existence, Thematic-relations hypothesis, Conceptual graphs, Semantic structures, Deep knowledge, Natural types, Role types, Attributes **5,** 193
Chemical compound design
Database systems, Logic-based approach **4,** 103
Chemical processing industry
Expert systems, Empirical knowledge, Causal models, Process constraints, Knowledge fault diagnosis **3,** 32
Chemical reaction
Language, Network **10,** 199
Chereme
Sign-language recognition, Gesture description **10,** 287
Chromosome analysis
Pattern recognition, Hypothesize-and-verify, Knowledge-based system **1,** 43
Claims
Data, Warrants **7,** 75
Classification
Data management, Metaphor, Connectionism, Artificial intelligence, Design **5,** 66
Classification abstraction
Association abstraction, Clustering **7,** 103
Clustering
Knowledge-based clustering, Maximal model, Noisy data, Natural clusters, Disjunctive cluster description, Model theory **4,** 87
Association abstraction, Classification abstraction **7,** 103
Clustering algorithm
User profile, Web tool **10,** 463
Coevolution of problem setting and problem solving
Relevance to the task at hand, Reflection in action, Multifaceted architecture, User interfaces for design, Computer-supported cooperative work, Integrated, Domain-oriented, Knowledge-based design environment, Design-support systems **5,** 15
Cognitive musicology
Composition theory, Musical creativity, Blackboard paradigm **3,** 36
Cognitive processes in design
Knowledge representation in design, Design fixation, Design flexibility **5,** 82
Cognitive psychology
Assistance systems, Artificial intelligence, Design, Organization, Planning, Strategies, Problem-solving processes **5,** 92
Cognitive semantics
Abduction, Design, Image schema **10,** 15
Cognitive task analysis
Intelligent tutoring systems, Interface design **6,** 249
Collaboration
Communication, Simulation **8,** 105
Colored tokens
Cumulative places, Deadlocks, Distributed intelligent systems, DIPS Petri net, Inhibition arcs, Matrix equations, Non-primitive places and transitions, Place invariants, Reachability trees (analysis), Scientific-community metaphors, Analysis **5,** 295
Combinatorial optimization
Graph coloring, Machine learning, Parallel search, Heuristic search **9,** 3
Parallel algorithms, Travelling salesperson problem **7,** 169
Commonsense intelligence
Tacit knowledge, Skill-based expertise, Symbolic expert systems **10,** 147
Commonsense reasoning
Information retrieval, Strategic explanation, Expert systems, Databases **1,** 32
Communication
Collaboration, Simulation **8,** 105
Compatibility cloud
Qualitative representation, Linguistic atom **10,** 431
Competition
Parallel processing, Rule-based expert system, Rule based partitioning assignment, Parameter allocation, Input/output dependence, Indeterminacy, Interactive application, Real-time application, Generalized neural network **2,** 27
Complex object-based inference mechanism
Hypothesis-object, Ship structural design, Complex object-based knowledge representation **10,** 121
Complex object-based knowledge representation
Complex object-based inference mechanism, Hypothesis-object, Ship structural design **10,** 121

Complexity
Programmable design environments, Applications **8,** 135
Composition theory
Musical creativity, Blackboard paradigm, Cognitive musicology **3,** 36
Compositional architectures
Generic task models, Redesign, Reuse **9,** 105
Computational biology
Network-growing algorithms, Theory refinement, KBANN algorithm **8,** 301
Computational modes
Expert knowledge, Dialogue scenarios, Graphical interface, Conceptual programming, Automated program synthesis **4,** 16
Computational physics
User interface, Decision support **6,** 3
Computational reasoning
Logic programming, Fuzzy logic, Qualifiers, Modifiers, Connectives **4,** 52
Fuzzy logic, 1st-order fuzzy logic, Terms, Predicates, Qualifiers, Quantifiers, Modifiers, Connectives **5,** 106
Fuzzy clausal logic, Fuzzy theorem prover, Predicates, Qualifiers **8,** 174
Computer Aided Design
Prolog, Optimization, Current Context Memory, Backtracking, Knowledge-based system, Very Large Scale Integration **2,** 72
Computer support
Creativity, Knowledge **10,** 3
Computer vision
Pictures, Human-computer interaction, Knowledge representation, Perception **1,** 105
Computer-aided design
Structural engineering, Memory-based exploration **9,** 151
Computer-aided engineering and design
Languages, Non-standard logics, Object-oriented programming, Naive physics, Extensional / intensional descriptions, Artificial intelligence, Deduction and theorem proving, Knowledge representation formalisms and methods **1,** 67
Computer-assisted production
Expert systems, Knowledge-based systems, Task classification, Market trends **2,** 249
Computer-based design assistants
Designing, Design knowledge, Phenomenological equivalence, Design phenomena **5,** 3
Computer-supported cooperative work
Integrated, Domain-oriented, Knowledge-based design environment, Design-support systems, Co-evolution of problem setting and problem solving, Relevance to the task at hand, Reflection in action, Multifaceted architecture, User interfaces for design **5,** 15
Concept Base
KBMS, Knowledge base, Software environment, Databases, DAIDA **1,** 197
Concept classification
Inheritance systems, Knowledge acquisition **1,** 285
Conceptual analysis
Knowledge acquisition, Neat and scruffy philosophies, Intelligence systems **5,** 245
Conceptual graph theory
Temporal knowledge representation **4,** 197
Conceptual graphs
Lexical representations, Semantic structures **5,** 173
Temporal-knowledge representation, Discourse **5,** 183
Semantic structures, Deep knowledge, Natural types, Role types, Attributes, Characteristics, Existence, Thematic-relations hypothesis **5,** 193
Natural-language generation, Lexical choice, Paraphrases **5,** 200
Metaphor, Type hierarchy, Knowledge representation **5,** 223
Generalization hierarchies, Graph matching, Associative pattern retrieval **5,** 233
Conceptual modeling
Knowledge representation, Multiple agents **10,** 111
Conceptual networks
Back propagation **5,** 117
Conceptual programming
Automated program synthesis, Computational modes, Expert knowledge, Dialogue scenarios, Graphical interface **4,** 16
Shallow / deep knowledge, Expert / conceptual knowledge, Inductive shell **4,** 27
Concurrent engineering
Engineering design, Design lifecycle, Process plant, Negotiation, Conflict **9,** 207
Conditional probability
Belief networks, Uncertainty, Reasoning, Bayes' theorem **4,** 67
Conflict
Concurrent engineering, Engineering design, Design lifecycle, Process plant, Negotiation **9,** 207
Connectionism
Artificial intelligence, Design, Classification, Data management, Metaphor **5,** 66

Connectionist knowledge representation
Connectionist rule-based systems, Dynamic variable bindings, Hybrid systems **8,** 345
Connectionist rule-based systems
Connectionist knowledge representation, Dynamic variable bindings, Hybrid systems **8,** 345
Connectives
Computational reasoning, Logic programming, Fuzzy logic, Qualifiers, Modifiers **4,** 52
Computational reasoning, Fuzzy logic, 1st-order fuzzy logic, Terms, Predicates, Qualifiers, Quantifiers, Modifiers **5,** 106
Consensus making
Decision support systems, Problem solving **10,** 59
Consistency
Knowledge acquisition, Accuracy, Medical diagnosis, Knowledge bases **8,** 223
Consistency maintenance
Inheritance graph, (Symbolic) description, Abstraction mechanism, Specification, Selection, Engineering design, Knowledge representation, Taxonomic reasoning, Property inheritance, Object orientation, Messaging, Truth maintenance **2,** 178
Constrained resource programming
Constraint logic programming, Logic-based knowledge representation, Petri nets **10,** 71
Constraint logic programming
Logic-based knowledge representation, Petri nets, Constrained resource programming **10,** 71
Constraint processing
Layout, Knowledge-based design systems, Bibliographical survey **9,** 449
Constraint-oriented design
Assembly sequence planning, Case-based reasoning **4,** 123
Constraints
Heuristic search, Scheduling **10,** 169
Construction claims
Knowledge acquisition, Knowledge representation, Certainty factors, System validation, Expert system **2,** 158
Constructive induction
Knowledge discovery, Machine learning **10,** 421
Content-addressable memory
Production systems, Associative matching **8,** 14
Context
Knowledge-based systems, Architecture, Cooperation **10,** 253
Context exchange
Semantic interoperability, Lattice theory **8,** 5
Contextual design
User interface, Front ends **6,** 31
Continuous Boolean functions
Multilinear functions, Kullback-Leibler information **10,** 413
Control architecture
Goal-driven search, Backward-chaining, Expert system, Knowledge-based system, Blackboard system **3,** 236
Conversation
Planning, Mutual belief **7,** 265
Converter
Lisp, Rule-based program translator, Paramodulation **1,** 90
Cooperating knowledge-based systems
Cooperative problem solving, Object-oriented, Prolog **5,** 125
Distributed artificial intelligence, Environmental management **8,** 39
Cooperation
Problem solving, Distributed systems **6,** 77
Context, Knowledge-based systems, Architecture **10,** 253
Cooperative computing
Multiexpert systems, Knowledge-based design, Expert design advisors, CAD, Blackboards **5,** 41
Cooperative dialogue
Planning, Intentions **6,** 67
Cooperative problem solving
Object-oriented, Prolog, Cooperating knowledge-based systems **5,** 125
Human creativity, Domain-oriented design environments **7,** 221
Cooperative reasoning
Case-based reasoning, Rule-based reasoning **6,** 103
Cooperative systems
Intelligent assistance, Man-machine cooperation **8,** 117
Core language
Abduction, Dialogue **8,** 126
Corrective action
Expert systems, Knowledge acquisition, Probability values, Knowledge base, Expert **1,** 114
Creative design
Learning, Dynamic memory, Episodic memory **2,** 62
Emergence, Evolutionary processes, Design computing **9,** 435
Strategic knowledge, Creativity support **10,** 29
Creative systems
IPC-model, Discovery, Psychology-based model **9,** 385

Creative work support
Thought process record, KJ editor **10,** 43
Creativity
Knowledge, Computer support **10,** 3
Interactive multimedia, Design approaches **7,** 247
Viewpoint, Visualization, Interaction **9,** 369
Creativity support
Domain-oriented design environments (DODEs), Lifelong-learning **10,** 21
Creative design, Strategic knowledge **10,** 29
Creativity support systems
Human creativity, Design concepts **7,** 223
Crop management
Papaya, Hawaii, Management expert system, System design, Bulletin boards **3,** 163
Cross-sales
Data Mining, Characteristic rule discovery, Deviation detection **10,** 449
Cumulative places
Deadlocks, Distributed intelligent systems, DIPS Petri net, Inhibition arcs, Matrix equations, Non-primitive places and transitions, Place invariants, Reachability trees (analysis), Scientific-community metaphors, Analysis, Colored tokens **5,** 295
Current Context Memory
Backtracking, Knowledge-based system, Very Large Scale Integration, Computer Aided Design, Prolog, Optimization **2,** 72
Customizability
Adaptive interfaces, Usage profiles **6,** 230
DAIDA
Concept Base, KBMS, Knowledge base, Software environment, Databases **1,** 197
Data
Boolean algebra, Transformations, Expert systems, Databases **3,** 21
Claims, Warrants **7,** 75
Data change
Knowledge representation, Knowledge discovery in databases, Inheritance inference, Error analysis **9,** 267
Data dictionary
Knowledge base, Expert system, Maintenance, Design, Database, Database management system, Modelling, Heuristics, Relational calculus **2,** 14
Data exploration
Artificial intelligence, Planning **10,** 265
Data management
Metaphor, Connectionism, Artificial intelligence, Design, Classification **5,** 66
Data Mining
Characteristic rule discovery, Deviation detection, Cross-sales **10,** 449
Data partitioning
Distributable clusters, Knowledge-base, Logic systems, Matrix model, Prolog, Representation **3,** 230
Database
Database management system, Modelling, Heuristics, Relational calculus, Data dictionary, Knowledge base, Expert system, Maintenance, Design **2,** 14
Database management system
Fourth generation language, Fifth generation language, Knowledge based system, Expert system, Prolog, Logic programming **1,** 24
Modelling, Heuristics, Relational calculus, Data dictionary, Knowledge base, Expert system, Maintenance, Design, Database **2,** 14
Database systems
Material selection, Knowledge-based systems **4,** 95
Logic-based approach, Chemical compound design **4,** 103
Database technology
Statistical database, Knowledge acquisition, Implementation, Knowledge-based system **1,** 279
Databases
Commonsense reasoning, Information retrieval, Strategic explanation, Expert systems **1,** 32
DAIDA, Concept Base, KBMS, Knowledge base, Software environment, **1,** 197
Evaluational and non-evaluational approaches, Indexing, Knowledge engineering, Prolog **2,** 203
Data, Boolean algebra, Transformations, Expert systems **3,** 21
Deadlocks
Distributed intelligent systems, DIPS Petri net, Inhibition arcs, Matrix equations, Non-primitive places and transitions, Place invariants, Reachability trees (analysis), Scientific-community metaphors, Analysis, Colored tokens, Cumulative places **5,** 295
Debugging
Fault detection algorithm, Non-monotonic reliability **2,** 185
Decision support
User interface, Computational physics **6,** 3
Decision support systems
Problem solving, Consensus making **10,** 59
Artificial neural networks, Urban planning, Knowledge-based systems **10,** 103

Decision-support systems
Expert systems **4,** 172
Decision-tree generators
Neural networks **8,** 333
Declarative languages
Semantic networks, Knowledge-based systems, Knowledge representation, Knowledge manipulation engines, Intelligent file stores, Associative memory **1,** 166
Declarative programming
Knowledge bases, Programming environments, Program synthesis **4,** 4
Deduction and theorem proving
Knowledge representation formalisms and methods, Computer-aided engineering and design, Languages, Non-standard logics, Object-oriented programming, Naive physics, Extensional/intensional descriptions, Artificial intelligence **1,** 67
Deductive databases
Prolog, Parlog, Logic programming **1,** 188
Knowledge-based systems, Knowledge systems design, Normal forms, Logic programming, Expert systems, Knowledge bases **2,** 147
Deductive learning
Hypothetical reasoning, Efficient inference **7,** 189
Deep knowledge
Natural types, Role types, Attributes, Characteristics, Existence, Thematic-relations hypothesis, Conceptual graphs, Semantic structures **5,** 193
Delegation
Participatory theater, Agentsheets, Direct-manipulation **9,** 351
Dempster's combining rule
Inference engine, Expert systems, Interval-given probabilities **3,** 13
Deontic knowledge base
Regulation text analysis, Text structuring, Knowledge acquisition **3,** 108
Dependency
Text simplification, Supertags **10,** 183
Design
Database, Database management system, Modelling, Heuristics, Relational calculus, Data dictionary, Knowledge base, Expert system, Maintenance **2,** 14
Classification, Data management, Metaphor, Connectionism, Artificial intelligence **5,** 66
Organization, Planning, Strategies, Problem-solving processes, Cognitive psychology, Assistance systems, Artificial intelligence **5,** 92
Knowledge delivery, Elicitation **8,** 94
Land development, Geographical Information System **9,** 307
Image schema, Cognitive semantics, Abduction **10,** 15
Design actions
Logical/linguistic model, Hierarchical planning **3,** 242
Design approaches
Interactive multimedia, Creativity **7,** 247
Design computing
Creative design, Emergence, Evolutionary processes **9,** 435
Design concepts
Creativity support systems, Human creativity **7,** 223
Design coordination
Blackboards, Intelligent design assistance **5,** 55
Design description
Pattern recognition, Pattern generation, Structural recognition, Machine learning, Grammatical inference **1,** 78
Design exploration
Reason maintenance, Blackboard control, Design support, Pharmaceutical drugs, System architecture **5,** 31
Design fixation
Design flexibility, Cognitive processes in design, Knowledge representation in design **5,** 82
Design flexibility
Cognitive processes in design, Knowledge representation in design, Design fixation **5,** 82
Design knowledge
Phenomenological equivalence, Design phenomena, Computer-based design assistants, Designing **5,** 3
Design knowledge capture
Knowledge-decomposition scheme, Problem identification **4,** 35
Design lifecycle
Process plant, Negotiation, Conflict, Concurrent engineering, Engineering design **9,** 207
Design phenomena
Computer-based design assistants, Designing, Design knowledge, Phenomenological equivalence **5,** 3
Design plan systems
Design procedure, Design rationale, Case-based reasoning, Mechanical design **10,** 337
Design plans
Rhetorical structure theory, Discourse modelling, Explanations **9,** 23
Design procedure

Design rationale, Case-based reasoning, Mechanical design, Design plan systems **10,** 337
Design rationale
User interfaces, Tailoring **7,** 253
Case-based reasoning, Mechanical design, Design plan systems, Design procedure **10,** 337
Design reuse
Synthesis, Numerical and object modelling, Machine learning **9,** 183
Design support
Pharmaceutical drugs, System architecture, Design exploration, Reason maintenance, Blackboard control **5,** 31
Design-support systems
Coevolution of problem setting and problem solving, Relevance to the task at hand, Reflection in action, Multifaceted architecture, User interfaces for design, Computer-supported cooperative work, Integrated, Domain-oriented, Knowledge-based design environment **5,** 15
Designing
Design knowledge, Phenomenological equivalence, Design phenomena, Computer-based design assistants **5,** 3
Development perspectives
Knowledge engineering, Situated action **7,** 271
Deviation detection
Cross-sales, Data Mining, Characteristic rule discovery **10,** 449
Diagnostic expert systems
Probabilistic models, Certainty factor models **7,** 17
Diagnostic model
Expert system, Findings base, Hypotheses base **2,** 165
Dialog
Speech, Feedback, Repair, Agents, Telephony **8,** 143
Dialogue
Abduction, Core language **8,** 126
Dialogue modelling
Discourse theory, Human-computer collaboration **8,** 82
Dialogue scenarios
Graphical interface, Conceptual programming, Automated program synthesis, Computational modes, Expert knowledge **4,** 16
Dimensionality reduction
Discretization, Knowledge discovery **9,** 67
DIPS Petri net
Inhibition arcs, Matrix equations, Non-primitive places and transitions, Place invariants, Reachability trees (analysis), Scientific-community metaphors, Analysis, Colored tokens, Cumulative places, Deadlocks, Distributed intelligent systems **5,** 295
Direct manipulation
Interactive programming, Environments **7,** 239
Direct-manipulation
Delegation, Participatory theater, Agentsheets **9,** 351
Discourse
Conceptual graphs, Temporal-knowledge representation **5,** 183
Human-computer interaction, Plans **7,** 268
Discourse modelling
Discourse planning, Natural language generation **7,** 274
Explanations, Design plans, Rhetorical structure theory **9,** 23
Discourse planning
Discourse modelling, Natural language generation **7,** 274
Discourse theory
Dialogue modelling, Human-computer collaboration **8,** 82
Discovery
Psychology-based model, Creative systems, IPC-model **9,** 385
Discretization
Knowledge discovery, Dimensionality reduction **9,** 67
Discriminant analysis
Legal expert systems, Legal reasoning, Explanation systems **2,** 46
Disjunctive cluster description
Model theory, Clustering, Knowledge-based clustering, Maximal model, Noisy data, Natural clusters **4,** 87
Distributable clusters
Knowledge-base, Logic systems, Matrix model, Prolog, Representation, Data partitioning **3,** 230
Distributed artificial intelligence
Cooperating knowledge-based systems, Environmental management **8,** 39
Distributed expert systems
Autonomous mobile robots, Real-time expert systems, Production systems, Rete network, Multi-processor architectures **2,** 117
Distributed intelligent systems
DIPS Petri net, Inhibition arcs, Matrix equations, Non-primitive places and transitions, Place invariants, Reachability trees (analysis), Scientific-community metaphors, Analysis, Colored tokens, Cu-

mulative places, Deadlocks **5,** 295
Distributed problem solving
Open information systems, Inference control mechanisms **8,** 235
Distributed systems
Cooperation, Problem solving **6,** 77
Divergent thinking
Information retrieval, Outsider agent **9,** 377
Industrial design, Idea generation support system **10,** 37
Domain knowledge
Requirements specification, Requirements engineering, Knowledge base, Systems analyst, Model primitives **1,** 179
Languages, RBFS, VEGAN, KET, Knowledge representation, Knowledge acquisition, Expert system, Knowledge engineer **1,** 301
Domain-oriented
Knowledge-based design environment, Design-support systems, Coevolution of problem setting and problem solving, Relevance to the task at hand, Reflection in action, Multifaceted architecture, User interfaces for design, Computer-supported cooperative work, Integrated **5,** 15
Domain-oriented design environments
Human creativity, Cooperative problem solving **7,** 221
Domain-oriented design environments (DODEs)
Lifelong-learning, Creativity support **10,** 21
Drawing interpretation
Knowledge classification **2,** 99
Drug design
Logic programming, Inference **6,** 114
Dynamic memory
Episodic memory, Creative design, Learning **2,** 62
Dynamic variable bindings
Connectionist rule-based systems, Connectionist knowledge representation, Hybrid systems **8,** 345
Editorial comprehension
Knowledge-based systems, Argument representation **3,** 87
Knowledge-based systems, Argument representations **3,** 139
Efficient inference
Hypothetical reasoning, Deductive learning **7,** 189
Electroencephalograms
Ocular artefacts, Intelligent signal processing **8,** 164
Electronic coordination mechanisms
Task allocation **10,** 325
Elicitation
Design, Knowledge delivery **8,** 94
Emergence
Evolutionary processes, Design computing, Creative design **9,** 435
Empirical knowledge
Causal models, Process constraints, Knowledge fault diagnosis, Chemical processing industry, Expert systems **3,** 32
Empirical/analytical/integrated learning
Negative Instance Elimination algorithm, Candidate Elimination algorithm **2,** 83
Enabling technologies
Knowledge-based programming, Artificial intelligence, Software development **1,** 221
Engineering design
Knowledge representation, Taxonomic reasoning, Property inheritance, Object orientation, Messaging, Truth maintenance, Consistency maintenance, Inheritance graph, (Symbolic) description, Abstraction mechanism, Specification, Selection **2,** 178
Object-oriented information systems, Property descriptions, Information modelling, Extensible organization **8,** 279
Model-based diagnosis **9,** 93
Design lifecycle, Process plant, Negotiation, Conflict, Concurrent engineering **9,** 207
Engineering modelling
Reusability, Model fragment libraries, Assumption management **9,** 119
Entropy
Nodes, Knowledge base, Binary relations, Channel matrix **3,** 17
Environmental management
Distributed artificial intelligence, Cooperating knowledge-based systems **8,** 39
Environments
Direct manipulation, Interactive programming **7,** 239
Episodic memory
Creative design, Learning, Dynamic memory **2,** 62
Epsilon-focusing
Active example selection, Example-based learning, Face detection **10,** 441
Equation solving
Set theory, Truth maintenance **5,** 289
ERAE
Knowledge engineering, Requirements engineering, Languages **1,** 211
Error analysis
Data change, Knowledge representation, Knowledge discovery in databases, Inheritance in-

ference **9,** 267

Error classification
Usability testing, User modelling, User knowledge, Human-computer interaction, Errors **3,** 67

Errors
Error classification, Usability testing, User modelling, User knowledge, Human-computer interaction **3,** 67

ESPRIT programme
Knowledge-base environment, Large database systems **3,** 215

Evaluation methods
Systems development, Small businesses **7,** 27

Evaluational and non-evaluational approaches
Indexing, Knowledge engineering, Prolog, Databases **2,** 203

Evaluator
Knowledge-based front end, Knowledge base, Logic programming, Statistical analysis, GLIM: Prolog, APES **1,** 173

Event-centered representation
Knowledge acquisition from texts, Knowledge representation **10,** 237

Event-driven simulation
Process monitoring, Behavioural modelling, Rule based diagnosis **9,** 525

Evolutionary processes
Design computing, Creative design, Emergence **9,** 435

Example-based learning
Face detection, Epsilon-focusing, Active example selection **10,** 441

Existence
Thematic-relations hypothesis, Conceptual graphs, Semantic structures, Deep knowledge, Natural types, Role types, Attributes, Characteristics **5,** 193

Expert
Corrective action, Expert systems, Knowledge acquisition, Probability values, Knowledge base **1,** 114

Expert design advisors
CAD, Blackboards, Cooperative computing, Multi-expert systems, Knowledge-based design **5,** 41

Expert knowledge
Dialogue scenarios, Graphical interface, Conceptual programming, Automated program synthesis, Computational modes **4,** 16

Expert system
Knowledge acquisition, Knowledge base, Expert system shell, Implementation **1,** 11
Prolog, Logic programming, Database management system, Fourth generation language, Fifth generation language, Knowledge based system **1,** 24
WIESC, SERPES, WADNES, WIESSE, Paper knowledge base, Knowledge representation, Reasoning strategies **1,** 153
Knowledge engineer, Domain knowledge, Languages, RBFS, VEGAN, KET, Knowledge representation, Knowledge acquisition **1,** 301
Spectra, Mineral identification **2,** 5
Maintenance, Design, Database, Database management system, Modelling, Heuristics, Relational calculus, Data dictionary, Knowledge base **2,** 14
Construction claims, Knowledge acquisition, Knowledge representation, Certainty factors, System validation **2,** 158
Findings base, Hypotheses base, Diagnostic model **2,** 165
Rule-based machine diagnosis, Architecture **2,** 228
Knowledge-based system, Blackboard system, Control architecture, Goal-driven search, Backward-chaining **3,** 236
Petri nets, Invariants analysis, Reachability tree analysis **4,** 144

Expert system shell
Implementation, Expert system, Knowledge acquisition, Knowledge base **1,** 11

Expert systems
Databases, Commonsense reasoning, Information retrieval, Strategic explanation **1,** 32
Knowledge acquisition, Probability values, Knowledge base, Expert, Corrective action **1,** 114
Toolkit, Architecture, Building methodology **1,** 132
Knowledge bases, Deductive databases, Knowledge-based systems, Knowledge systems design, Normal forms, Logic programming **2,** 147
Knowledge-based systems, Task classification, Market trends, Computer-assisted production **2,** 249
Knowledge integration, Probability distribution **3,** 7
Interval-given probabilities, Dempster's combining rule, Inference engine **3,** 13
Databases, Data, Boolean algebra, Transformations **3,** 21
Hermeneutics, Reasoning systems **3,** 25
Empirical knowledge, Causal models, Process constraints, Knowledge fault diagnosis, Chemical processing industry **3,** 32

Rule-based systems, Neural architecture **3,** 48
Project management, Management information systems, Transaction processing systems **3,** 170
Knowledge acquisition, Integration, Intelligent tutoring **3,** 192
Monitoring and control, Knowledge base, User interaction **4,** 165
Decision-support systems **4,** 172
Scheduling, Backtracking strategy, Prolog, Rule-based systems, Resource allocation **4,** 215
Methods, Uncertainty handling, Rule-based systems, Knowledge acquisition **4,** 225
System development, Tools, Tool selection **5,** 137
Transfer management framework, Technology transfer **5,** 258
Knowledge bases, Process plans **5,** 269
Fault diagnosis, Genetic algorithms **5,** 277
Product-liability claim evaluation, Settlement decisions **7,** 37

Expert/conceptual knowledge
Inductive shell, Conceptual programming, Shallow/deep knowledge **4,** 27

Explanation
Arguments, Rule-based programs, Logic programming, Knowledge-based systems **4,** 177

Explanation based learning
Heuristic classification, Meta-knowledge, Object-oriented programming, Software engineering, Knowledge engineering **2,** 133

Explanation systems
Discriminant analysis, Legal expert systems, Legal reasoning **2,** 46

Explanation-based learning
Knowledge organization, Rule-based systems **7,** 177

Explanations
Design plans, Rhetorical structure theory, Discourse modelling **9,** 23

Extensible organization
Object-oriented information systems, Engineering design, Property descriptions, Information modelling **8,** 279

Extensional/intensional descriptions
Artificial intelligence, Deduction and theorem proving, Knowledge representation formalisms and methods, Computer-aided engineering and design, Languages, Non-standard logics, Object-oriented programming, Naive physics **1,** 67

Face detection
Epsilon-focusing, Active example selection, Example-based learning **10,** 441

Fault detection algorithm
Non-monotonic reliability, Debugging **2,** 185

Fault diagnosis
Genetic algorithms, Expert systems **5,** 277
Model-based reasoning, Hydraulic systems **7,** 127

Feedback
Speech, Dialog, Repair, Agents, Telephony **8,** 143

Fidelity
Many-valued logic, Non-monotonic logic, Fuzzy logic, Inference **9,** 483

Fifth generation language
Knowledge based system, Expert system, Prolog, Logic programming, Database management system, Fourth generation language **1,** 24

Findings base
Hypotheses base, Diagnostic model, Expert system **2,** 165

Fire detection
Rule-based expert system, Machine vision **9,** 531

First principle
Scale-type, Invariance, Scientific discovery, Knowledge discovery **10,** 403

Flexible machining
Knowledge-based modelling, Hierarchical abstraction **5,** 158

Fourth generation language
Fifth generation language, Knowledge based system, Expert system, Prolog, Logic programming, Database management system **1,** 24

Fractal
Pattern classifier, Artificial neural networks **10,** 177

Frames
Knowledge-based software system, Artificial intelligence, Software engineering, Rapid prototyping **2,** 239

Frames
Slots, Backtracking, Rule base, Inference machine **4,** 131

Front ends
User interface, Problem solvers **6,** 11
Simulation **6,** 17
User interface, Contextual design **6,** 31

Front-end
User-interface, Knowledge-based front-end,

Knowledge-based support, Integration **3,** 221
Function of similarity
Case-based reasoning, Neural nets **9,** 465
Functional fixedness
Reusability **9,** 137
Fuzzy clausal logic
Computational reasoning, Fuzzy theorem prover, Predicates, Qualifiers **8,** 174
Fuzzy computation
Fuzzy inference engines, Fuzzy expert systems **2,** 109
Fuzzy control
Neural networks, Numerical pattern recognition, Signal processing, Syntactic pattern recognition **8,** 359
Fuzzy expert systems
Fuzzy computation, Fuzzy inference engines **2,** 109
Fuzzy inference engines
Fuzzy expert systems, Fuzzy computation **2,** 109
Fuzzy logic
Qualifiers, Modifiers, Connectives, Computational reasoning, Logic programming **4,** 52
1st-order fuzzy logic, Terms, Predicates, Qualifiers, Quantifiers, Modifiers, Connectives, Computational reasoning **5,** 106
Inference, Fidelity, Many-valued logic, Non-monotonic logic **9,** 483
Fuzzy neural networks
Rule extraction, Rule refinement, Knowledge insertion, Inferencing **8,** 373
Fuzzy set theory
Case-based reasoning, Health care **8,** 32
Fuzzy theorem prover
Computational reasoning, Fuzzy clausal logic, Predicates, Qualifiers **8,** 174
Generalization hierarchies
Graph matching, Associative pattern retrieval, Conceptual graphs **5,** 233
Generalized neural network
Competition, Parallel processing, Rule-based expert system, Rule based partitioning assignment, Parameter allocation, Input/output dependence, Indeterminacy, Interactive application, Real-time application **2,** 27
Generic task models
Redesign, Reuse, Compositional architectures **9,** 105
Genetic algorithms
Expert systems, Fault diagnosis **5,** 277
Prototype control rules, Nearest- neighbour algorithms **7,** 142
Graphical user interfaces, Blackboard systems **7,** 199
Geographic information systems
Navigation, Quadtrees, Algorithms **4,** 157
Geographical Information System
Design, Land development **9,** 307
Gesture description
Chereme, Sign-language recognition **10,** 287
GLIM: Prolog
APES, Evaluator, Knowledge-based front end, Knowledge base, Logic programming, Statistical analysis **1,** 173
Goal-driven search
Backward-chaining, Expert system, Knowledge-based system, Blackboard system, Control architecture **3,** 236
Grammar
Parsing, Knowledge representation, Natural-language processing **5,** 213
Grammatical inference
Design description, Pattern recognition, Pattern generation, Structural recognition, Machine learning **1,** 78
Graph coloring
Machine learning, Parallel search, Heuristic search, Combinatorial optimization **9,** 3
Graph matching
Associative pattern retrieval, Conceptual graphs, Generalization hierarchies **5,** 233
Graph reduction
Parallel processing, Production systems, ALICE system **8,** 155
Graphical interface
Conceptual programming, Automated program synthesis, Computational modes, Expert knowledge, Dialogue scenarios **4,** 16
Graphs
Reasoning, Inference engine **4,** 75
Hawaii
Management expert system, System design, Bulletin boards, Crop management, Papaya **3,** 163
Health care
Case-based reasoning, Fuzzy set theory **8,** 32
Hermeneutics
Reasoning systems, Expert systems **3,** 25
Heuristic classification
Meta-knowledge, Object-oriented programming, Software engineering, Knowledge engineering, Explanation based learning **2,** 133

Heuristic control knowledge
Software configuration management, Version control **9,** 61
Heuristic search
Combinatorial optimization, Graph coloring, Machine learning, Parallel search **9,** 3
Scheduling, Constraints **10,** 169
Heuristics
Relational calculus, Data dictionary, Knowledge base, Expert system, Maintenance, Design, Database, Database management system, Modelling **2,** 14
Petri nets, Reachability trees **6,** 174
Hierarchical abstraction
Flexible machining, Knowledge-based modelling **5,** 158
Hierarchical planning
Design actions, Logical/linguistic model **3,** 242
Hierarchy of choreographic tasks
Parametrical notion of movement, Laban concepts **3,** 42
Horn
Question-asking **10,** 81
Horn clauses
Knowledge-base management, Knowledge-base architecture, Rule base, Logic rules **4,** 82
Human creativity
Cooperative problem solving, Domain-oriented design environments **7,** 221
Creativity support systems, Design concepts **7,** 223
Human figure animation
Motion control, Procedural animation, Signal processing **9,** 359
Human memory
Representations, Binding, Memory, PDP system, Knowledge-rich **1,** 143
Human perspectives
Organizational perspectives, Manufacturing, Innovation **5,** 149
Human-computer collaboration
Human computer collaboration **8,** 67
Discourse theory, Dialogue modelling **8,** 82
Human-computer dialogue, Problem solving, Natural language understanding **8,** 211
Human-computer dialogue
Human-computer collaboration, Problem solving, Natural language understanding **8,** 211
Human-computer interaction
Knowledge representation, Perception, Computer vision, Pictures **1,** 105
Errors, Error classification, Usability testing, User modelling, User knowledge **3,** 67
Adaptive interfaces, Intelligent systems **6,** 189
Discourse, Plans **7,** 268
Human-machine performance
Natural language dialogue, Problem solving **7,** 277
Hybrid knowledge representation
Cabin crew planning **8,** 55
Hybrid knowledge-base architecture
Intelligent signal inspection systems, Syntactic pattern recognition **8,** 21
Hybrid systems
AI and music, Multimedia knowledge representation **7,** 114
Connectionist rule-based systems, Connectionist knowledge representation, Dynamic variable bindings **8,** 345
Hydraulic systems
Fault diagnosis, Model-based reasoning **7,** 127
Hypotheses base
Diagnostic model, Expert system, Findings base **2,** 165
Hypothesis-object
Ship structural design, Complex object-based knowledge representation, Complex object-based inference mechanism **10,** 121
Hypothesize-and-verify
Knowledge-based system, Chromosome analysis, Pattern recognition **1,** 43
Hypothetical reasoning
Knowledge assimilation, Knowledge management, Inductive inference, Logical knowledge base **3,** 77
Predicate logic **6,** 87
Deductive learning, Efficient inference **7,** 189
Predicate logic, Optimal solution search **9,** 163
Idea generation support system
Divergent thinking, Industrial design **10,** 37
Image database
Knowledge-based systems, Image management **4,** 209
Image management
Image database, Knowledge-based systems **4,** 209
Image schema
Cognitive semantics, Abduction, Design **10,** 15
Implementation
Expert system, Knowledge acquisition, Knowledge base, Expert system shell **1,** 11
Knowledge-based system, Database technology, Statistical database, Knowledge acquisition **1,** 279

Incomplete information
Maximum entropy, Causal networks **9,** 315
Probability, Causal networks, Maximum Entropy, Reasoning under uncertainty **10,** 213
Indeterminacy
Interactive application, Real-time application, Generalized neural network, Competition, Parallel processing, Rule-based expert system, Rule based partitioning assignment, Parameter allocation, Input/output dependence **2,** 27
Indexing
Knowledge engineering, Prolog, Databases, Evaluational and non-evaluational approaches **2,** 203
Multimedia, Intelligent tutoring systems, Care-based reasoning **9,** 491
Induction
Knowledge acquisition, Valiant's framework, Perceptrons, Learning **2,** 52
Inductive inference
Logical knowledge base, Hypothetical reasoning, Knowledge assimilation, Knowledge management **3,** 77
Inductive shell
Conceptual programming, Shallow / deep knowledge, Expert/conceptual knowledge **4,** 27
Industrial design
Idea generation support system, Divergent thinking **10,** 37
Inference
Drug design, Logic programming **6,** 114
Fidelity, Many-valued logic, Non-monotonic logic, Fuzzy logic **9,** 483
Inference control mechanisms
Open information systems, Distributed problem solving **8,** 235
Inference engine
Expert systems, Interval-given probabilities, Dempster's combining rule **3,** 13
Graphs, Reasoning **4,** 75
Inference machine
Frames, Slots, Backtracking, Rule base **4,** 131
Inference methods
Nonmonotonic derivation, Nute's theory of derivations, Knowledge-based systems **3,** 28
Inference techniques
Canonical graphs, Reasoning, Rule-based systems, Knowledge representation **1,** 266
Inferencing
Fuzzy neural networks, Rule extraction, Rule refinement, Knowledge insertion **8,** 373
Information acquisition
Intelligent data handling, Medical expert systems **6,** 141
Information modelling
Object-oriented information systems, Engineering design, Property descriptions, Extensible organization **8,** 279
Information repository
Knowledge sharing, Multiple agents **9,** 329
Information retrieval
Strategic explanation, Expert systems, Databases, Commonsense reasoning **1,** 32
Outsider agent, Divergent thinking **9,** 377
Information systems
Programming environment, RUBRIC, Software engineering, Software tools **1,** 227
Requirements analysis, Petri nets **6,** 165
Knowledge representation systems, Multi-agent systems **7,** 91
Inheritance graph
(Symbolic) description, Abstraction mechanism, Specification, Selection, Engineering design, Knowledge representation, Taxonomic reasoning, Property inheritance, Object orientation, Messaging, Truth maintenance, Consistency maintenance **2,** 178
Inheritance inference
Error analysis, Data change, Knowledge representation, Knowledge discovery in databases **9,** 267
Inheritance systems
Knowledge acquisition, Concept classification **1,** 285
Inhibition arcs
Matrix equations, Non-primitive places and transitions, Place invariants, Reachability trees (analysis), Scientific-community metaphors, Analysis, Colored tokens, Cumulative places, Deadlocks, Distributed intelligent systems, DIPS Petri net **5,** 295
Innovation
Human perspectives, Organizational perspectives, Manufacturing **5,** 149
Input/output dependence
Indeterminacy, Interactive application, Real-time application, Generalized neural network, Competition, Parallel processing, Rule-based expert system, Rule based partitioning assignment, Parameter allocation **2,** 27
Integrated
Domain-oriented, Knowledge-based design environment, Design-support systems, Coevolution of problem setting and problem solving, Relevance to

the task at hand, Reflection in action, Multifaceted architecture, User interfaces for design, Computer-supported cooperative work **5,** 15

Integration
Artificial neural networks, Logic programming **9,** 501, **10,** 133
Intelligent tutoring, Expert systems, Knowledge acquisition **3,** 192
Front-end, User-interface, Knowledge-based front-end, Knowledge-based support **3,** 221

Integration of KBS and GIS
Temporal reasoning, Tesseral addressing **9,** 287

Integrity
Rule checking, Nonmonotonic knowledge bases **9,** 301

Intelligence analysis
Situation assessment, Situation prediction **10,** 87

Intelligence systems
Conceptual analysis, Knowledge acquisition, Neat and scruffy philosophies **5,** 245

Intelligent assistance
Cooperative systems, Man-machine cooperation **8,** 117

Intelligent CAD systems
Knowledge representation, Problem solving methods **7,** 154

Intelligent data handling
Information acquisition, Medical expert systems **6,** 141

Intelligent design assistance
Design coordination, Blackboards **5,** 55

Intelligent file stores
Associative memory, Declarative languages, Semantic networks, Knowledge-based systems, Knowledge representation, Knowledge manipulation engines **1,** 166

Intelligent information systems
Multi-strata model, Automatic system generation **10,** 363

Intelligent interfaces
Adaptive interfaces, User models **6,** 197
Usability, Adaptive hypermedia **10,** 311

Intelligent signal inspection systems
Hybrid knowledge-base architecture, Syntactic pattern recognition **8,** 21

Intelligent signal processing
Electroencephalograms, Ocular artefacts **8,** 164

Intelligent systems
Adaptive interfaces, Human-computer interaction **6,** 189

Intelligent training systems
Knowledge representation, Natural language **6,** 157

Intelligent tutoring
Expert systems, Knowledge acquisition, Integration **3,** 192

Intelligent tutoring systems
Cognitive task analysis, Interface design **6,** 249
Care-based reasoning, Indexing, Multimedia **9,** 491

Intelligent user interfaces
Adaptive interfaces, User models **6,** 239

Intentions
Planning, Cooperative dialogue **6,** 67

Interaction
Creativity, Viewpoint, Visualization **9,** 369

Interactions
Planning, Truth-maintenance systems **6,** 95

Interactive application
Real-time application, Generalized neural network, Competition, Parallel processing, Rule-based expert system, Rule based partitioning assignment, Parameter allocation, Input/output dependence, Indeterminacy **2,** 27

Interactive multimedia Creativity
Design, Approaches **7,** 247

Interactive programming
Direct manipulation, Environments **7,** 239

Interface agent
Training system, Radiotherapy treatment planning, Software agent **10,** 161

Interface design
Cognitive task analysis, Intelligent tutoring systems **6,** 249
Wizard of Oz studies, Natural-language interfaces **6,** 258

Interface separability
Back-end manager, User interface, Knowledge-based front-end **3,** 225

Interval-given probabilities
Dempster's combining rule, Inference engine, Expert systems **3,** 13

Interviewing
Knowledge acquisition, Knowledge elicitation **7,** 52

Invariance
Scientific discovery, Knowledge discovery, First principle, Scale-type **10,** 403

Invariants analysis
Reachability tree analysis, Expert system, Petri nets **4,** 144

IPC-model
Discovery, Psychology-based model, Creative systems **9,** 385
IPSE

User interaction, Expert systems, Monitoring and control **4,** 165
Knowledge based system
Expert system, Prolog, Logic programming, Database management system, Fourth generation language, Fifth generation language **1,** 24
Knowledge bases
Programming environments, Program synthesis, Declarative programming **4,** 4
Knowledge acquisition, Refinement **4,** 231
Process plans, Expert systems **5,** 269
Deductive databases, Knowledge-based systems, Knowledge systems design, Normal forms, Logic programming, Expert systems **2,** 147
Knowledge acquisition, Accuracy Consistency, Medical diagnosis **8,** 223

Knowledge representation, Linear logic **10,** 359
Knowledge classification
Drawing interpretation **2,** 99
Knowledge delivery
Design, Elicitation **8,** 94
Knowledge discovery
Dimensionality reduction, Discretization **9,** 67
First principle, Scale-type, Invariance, Scientific discovery **10,** 403
Machine learning, Constructive induction **10,** 421
Knowledge discovery in databases
Inheritance inference, Error analysis, Data change, Knowledge representation **9,** 267
Knowledge elicitation
Interviewing, Knowledge acquisition **7,** 52
Knowledge engineer
Domain knowledge, Languages, RBFS, VEGAN, KET, Knowledge representation, Knowledge acquisition, Expert system **1,** 301
Knowledge engineering
Requirements engineering, Languages, ERAE **1,** 211
Explanation based learning, Heuristic classification, Meta-knowledge, Object-oriented programming, Software engineering **2,** 133
Prolog, Databases, Evaluational and non-evaluational approaches, Indexing **2,** 203
Knowledge acquisition, Meronymic inheritance, Taxonomy, Rule Based Frame System **2,** 219
Development perspectives, Situated action **7,** 271
Knowledge acquisition, Brewing **8,** 259
Case retrieval **9,** 83
Machine learning, Production rules automatic generation, Multistrategy reasoning **9,** 509
Knowledge fault diagnosis
Chemical processing industry, Expert systems, Empirical knowledge, Causal models, Process constraints **3,** 32
Knowledge insertion
Fuzzy neural networks, Rule extraction, Rule refinement, Inferencing **8,** 373
Knowledge integration
Probability distribution, Expert systems **3,** 7
Knowledge management
Inductive inference, Logical knowledge base, Hypothetical reasoning, Knowledge assimilation **3,** 77
Knowledge manipulation engines
Intelligent file stores, Associative memory, Declarative languages, Semantic networks, Knowledge-based systems, Knowledge representation **1,** 166
Knowledge modelling
Knowledge analysis **9,** 41
Knowledge organization
Rule-based Systems, Explanation- based learning **7,** 177
Knowledge representation
Perception, Computer vision, Pictures, Human-computer interaction **1,** 105
Reasoning strategies, Expert system, WIESC, SERPES, WADNES, WIESSE, Paper knowledge base **1,** 153
Knowledge manipulation engines, Intelligent file stores, Associative memory, Declarative languages, Semantic networks, Knowledge-based systems **1,** 166
Inference techniques, Canonical graphs, Reasoning, Rule-based systems **1,** 266
Knowledge acquisition, Expert system, Knowledge engineer, Domain knowledge, Languages, RBFS, VEGAN, KET **1,** 301
Certainty factors, System validation, Expert system, Construction claims, Knowledge acquisition **2,** 158
Taxonomic reasoning, Property inheritance, Object orientation, Messaging, Truth maintenance, Consistency maintenance, Inheritance graph **2,** 178
Planning system, Temporal planning, Autonomous agent, Artificial intelligence **2,** 210
Non-monotonic logic, Automated reasoning, Knowledge-based software systems **3,** 131
Natural-language processing, Grammar, Parsing **5,** 213
Conceptual graphs, Metaphor, Type hierarchy **5,** 223
Natural language, Intelligent training systems **6,** 157
Artificial intelligence, Blackboard systems **7,** 5
Knowledge sharing, Modules **7,** 49
Intelligent CAD systems, Problem solving methods **7,** 154
Preliminary engineering, Model based reasoning **7,** 161
Knowledge discovery in databases, Inheritance inference, Error analysis, Data change **9,** 267
Multiple agents, Conceptual modeling **10,** 111
Event-centered representation, Knowledge acquisition from texts **10,** 237
Linear logic, Knowledge bases **10,** 359
Knowledge representation formalisms and methods
Computer-aided engineering and design, Lan-

guages, Non-standard logics, Object-oriented programming, Naive physics, Extensional/intensional descriptions, Artificial intelligence, Deduction and theorem proving **1,** 67

Knowledge representation in design
Design fixation, Design flexibility, Cognitive processes in design **5,** 82

Knowledge representation systems
Information systems, Multi-agent systems **7,** 91

Knowledge sharing
Knowledge representation, Modules **7,** 49
Multiple agents, Information repository **9,** 329

Knowledge systems design
Normal forms, Logic programming, Expert systems, Knowledge bases, Deductive databases, Knowledge-based systems **2,** 147

Knowledge-base
Logic systems, Matrix model, Prolog, Representation, Data partitioning, Distributable clusters **3,** 230

Knowledge-base architecture
Rule base, Logic rules, Horn clauses, Knowledge-base management **4,** 82

Knowledge-base environment
Large database systems, ESPRIT programme **3,** 215

Knowledge-base management
Knowledge-base architecture, Rule base, Logic rules, Horn clauses **4,** 82

Knowledge-based clustering
Maximal model, Noisy data, Natural clusters, Disjunctive cluster description, Model theory, Clustering **4,** 87

Knowledge-based components
Abstract knowledge types, Blackboard architecture, Software engineering principles, Ada, Real-time embedded system, Knowledge-based techniques **9,** 417

Knowledge-based design
Expert design advisors, CAD, Blackboards, Cooperative computing, Multiexpert systems **5,** 41

Knowledge-based design environment
Design-support systems, Coevolution of problem setting and problem solving, Relevance to the task at hand, Reflection in action, Multifaceted architecture, User interfaces for design, Computer-supported cooperative work, Integrated, Domain-oriented **5,** 15

Knowledge-based design systems
Bibliographical survey, Constraint processing, Layout **9,** 449

Knowledge-based front end
Knowledge base, Logic programming, Statistical analysis, GLIM: Prolog, APES, Evaluator **1,** 173
Knowledge-based support, Integration, Front-end, User-interface **3,** 221
Interface separability, Back-end manager, User interface **3,** 225

Knowledge-based modelling
Hierarchical abstraction, Flexible machining **5,** 158

Knowledge-based neural networks **8,** 299

Knowledge-based programming
Artificial intelligence, Software development, Enabling technologies **1,** 221

Knowledge-based software system
Artificial intelligence, Software engineering, Rapid prototyping, Frames **2,** 239

Knowledge-based software systems
Knowledge representation, Non-monotonic logic, Automated reasoning **3,** 131

Knowledge-based support
Integration, Front-end, User-interface, Knowledge-based front-end **3,** 221

Knowledge-based system
Database technology, Statistical database, Knowledge acquisition, Implementation **1,** 279
Semi-automatic analysis, Artificial intelligence **1,** 292
Very Large Scale Integration, Computer Aided Design, Prolog, Optimization, Current Context Memory, Backtracking **2,** 72

Knowledge-based system
Chromosome analysis, Pattern recognition, Hypothesize-and-verify **1,** 43
Blackboard system, Control architecture, Goal-driven search, Backward-chaining, Expert system **3,** 236

Knowledge-based systems
Knowledge representation, Knowledge manipulation engines, Intelligent file stores, Associative memory, Declarative languages, Semantic networks **1,** 166
Knowledge systems design, Normal forms, Logic programming, Expert systems, Knowledge bases, Deductive databases **2,** 147
Task classification, Market trends, Computer-assisted production, Expert systems **2,** 249
Inference methods, Nonmonotonic derivation, Nute's theory of derivations **3,** 28
Argument representation, Editorial comprehension **3,** 87
Argument representations, Editorial comprehension **3,** 139
Database systems, Material selection **4,** 95Ex-

planation, Arguments, Rule-based programs, Logic programming **4,** 177
System development, Specification **4,** 186
Image management, Image database **4,** 209
Natural language processing, Program understanding, Reverse engineering, Object-oriented legacy code **9,** 517
Decision support systems, Artificial neural networks, Urban planning **10,** 103
Architecture, Cooperation, Context **10,** 253
Logic programming, Object-oriented programming, Specification, Verification **10,** 351

Knowledge-based techniques
Software design, Assessment, MDSE advisor, Software tools **1,** 235
Knowledge-based components, Abstract knowledge types, Blackboard architecture, Software engineering principles, Ada, Real-time embedded system **9,** 417

Knowledge-based user interfaces
Top-down hierarchical planning, Automated graphics generation **10,** 275

Knowledge-decomposition scheme
Problem identification, Design knowledge capture **4,** 35

Knowledge-oriented systems
Semantic networks, Parallel computers, Artificial intelligence **1,** 259

Knowledge-representation language
Multiple meta-level architecture, Problem-solving methods **3,** 204

Knowledge-rich
Human memory, Representations, Binding, Memory, PDP system **1,** 143

Kullback-Leibler information
Continuous Boolean functions, Multilinear functions **10,** 413

Laban concepts
Hierarchy of choreographic tasks, Parametrical notion of movement **3,** 42

Land development
Geographical Information System, Design **9,** 307

Language
Network, Chemical reaction **10,** 199

Languages
Non-standard logics, Object-oriented programming, Naive physics, Extensional/intensional descriptions, Artificial intelligence, Deduction and theorem proving, Knowledge representation formalisms and methods, Computer-aided engineering and design **1,** 67
ERAE, Knowledge engineering, Requirements engineering **1,** 211
RBFS, VEGAN, KET, Knowledge representation, Knowledge acquisition, Expert system, Knowledge engineer, Domain knowledge **1,** 301

Large database systems
ESPRIT programme, Knowledge-base environment **3,** 215

Lattice theory
Semantic interoperability, Context exchange **8,** 5

Layout
Knowledge-based design systems, Bibliographical survey, Constraint processing **9,** 449

Learning
Induction, Knowledge acquisition, Valiant's framework, Perceptrons **2,** 52
Dynamic memory, Episodic memory, Creative design **2,** 62
Natural language processing, Syntactic subcategorizations, Parsing **8,** 190

Legal expert systems
Legal reasoning, Explanation systems, Discriminant analysis **2,** 46

Legal reasoning
Explanation systems, Discriminant analysis, Legal expert systems **2,** 46

Lexical choice
Paraphrases, Conceptual graphs, Natural-language generation **5,** 200

Lexical representations
Semantic structures, Conceptual graphs **5,** 173

Lifelong-learning
Creativity support, Domain-oriented design environments (DODEs) **10,** 21

Linear logic
Knowledge bases, Knowledge representation **10,** 359

Linguistic atom
Compatibility cloud, Qualitative representation **10,** 431

Lisp
Rule-based program translator, Paramodulation, Converter **1,** 90

Logic programming
Database management system, Fourth generation language, Fifth generation language, Knowledge based system, Expert system, Prolog **1,** 24
Statistical analysis, GLIM: Prolog, APES, Evaluator, Knowledge-based front end, Knowledge base **1,** 173
Deductive databases, Prolog, Parlog **1,** 188

Expert systems, Knowledge bases, Deductive databases, Knowledge-based systems, Knowledge systems design, Normal forms **2,** 147
Fuzzy logic, Qualifiers, Modifiers, Connectives, Computational reasoning **4,** 52
Knowledge-based systems, Explanation, Arguments, Rule-based programs **4,** 177
Drug design, Inference **6,** 114
Object-oriented programming, Artificial intelligence **7,** 66
Integration, Artificial neural networks **9,** 501, **10,** 133
Object-oriented programming, Specification, Verification, Knowledge-based systems **10,** 351

Logic rules
Horn clauses, Knowledge-base management, Knowledge-base architecture, Rule base **4,** 82

Logic systems
Matrix model, Prolog, Representation, Data partitioning, Distributable clusters, Knowledge-base **3,** 230

Logic-based approach
Chemical compound design, Database systems **4,** 103

Logic-based knowledge representation
Petri nets, Constrained resource programming, Constraint logic programming **10,** 71

Logical knowledge base
Hypothetical reasoning, Knowledge assimilation, Knowledge management, Inductive inference **3,** 77

Logical/linguistic model
Hierarchical planning, Design actions **3,** 242

Machine learning
Grammatical inference, Design description, Pattern recognition, Pattern generation, Structural recognition **1,** 78
Software crisis, Specification, Verification, Validation **2,** 128
Parallel search, Heuristic search, Combinatorial optimization, Graph coloring **9,** 3
Design reuse, Synthesis, Numerical and object modelling **9,** 183
Apprenticeship learning, Knowledge acquisition **9,** 253
Production rules automatic generation, Multistrategy reasoning, Knowledge engineering **9,** 509
Constructive induction, Knowledge discovery **10,** 421

Machine vision
Fire detection, Rule-based expert system **9,** 531

Maintenance
Design, Database, Database management system, Modelling, Heuristics, Relational calculus, Data dictionary, Knowledge base, Expert system **2,** 14

Man-machine cooperation
Cooperative systems, Intelligent assistance **8,** 117

Management expert system
System design, Bulletin boards, Crop management, Papaya, Hawaii **3,** 163

Management information systems
Transaction processing systems, Expert systems, Project management **3,** 170

Manufacturing
Innovation, Human perspectives, Organizational perspectives **5,** 149

Many-valued logic
Non-monotonic logic, Fuzzy logic, Inference, Fidelity **9,** 483

Market trends
Computer-assisted production, Expert systems, Knowledge-based systems, Task classification **2,** 249

Material selection
Knowledge-based systems, Database systems **4,** 95

Matrix equations
Non-primitive places and transitions, Place invariants, Reachability trees (analysis), Scientific-community metaphors, Analysis, Colored tokens, Cumulative places, Deadlocks, Distributed intelligent systems, DIPS Petri net, Inhibition arcs **5,** 295

Matrix model
Prolog, Representation, Data partitioning, Distributable clusters, Knowledge-base, Logic systems **3,** 230

Maximal model
Noisy data, Natural clusters, Disjunctive cluster description, Model theory, Clustering, Knowledge-based clustering **4,** 87

Maximum entropy
Probabilistic reasoning, Reasoning with incomplete information, Probability, Reasoning under uncertainty **8,** 249
Causal networks, Incomplete information **9,** 315
Reasoning under uncertainty, Incomplete information, Probability, Causal networks **10,** 213

MDSE advisor
Software tools, Knowledge-based techniques, Software design, Assessment **1,** 235

Measurement systems
Blackboard architectures, Prolog **9,** 233

Mechanical design
Design plan systems, Design procedure, Design rationale, Case-based reasoning **10,** 337
Medical diagnosis
Knowledge acquisition, Accuracy, Consistency, Knowledge bases **8,** 223
Medical expert systems
Information acquisition, Intelligent data handling **6,** 141
Memory
PDP system, Knowledge-rich, Human memory, Representations, Binding **1,** 143
Memory-based exploration
Computer-aided design, Structural engineering **9,** 151
Meronymic inheritance
Taxonomy, Rule Based Frame System, Knowledge engineering, Knowledge acquisition **2,** 219
Messaging
Truth maintenance, Consistency maintenance, Inheritance graph, (Symbolic) description, Abstraction mechanism, Specification, Selection, Engineering design, Knowledge representation, Taxonomic reasoning, Property inheritance, Object orientation **2,** 178
Meta-knowledge
Object-oriented programming, Software engineering, Knowledge engineering, Explanation based learning, Heuristic classification **2,** 133
Metaphor
Connectionism, Artificial intelligence, Design, Classification, Data management **5,** 66
Type hierarchy, Knowledge representation, Conceptual graphs **5,** 223
Metaphor interpretation
Natural language processing **9,** 339
Methods
Uncertainty handling, Rule-based systems, Knowledge acquisition, Expert systems **4,** 225
Microprocessor systems diagnosis
Time range reasoning **9,** 173
Mineral identification
Expert system, Spectran **2,** 5
Model based reasoning
Knowledge representation, Preliminary engineering **7,** 161
Model building
Problem decomposition, Problem solving **6,** 38
Model fragment libraries
Assumption management, Engineering modelling, Reusability **9,** 119
Model primitives
Domain knowledge, Requirements specification, Requirements engineering, Knowledge base, Systems analyst **1,** 179
Model theory
Clustering, Knowledge-based clustering, Maximal model, Noisy data, Natural clusters, Disjunctive cluster description **4,** 87
Model-based diagnosis
Engineering design **9,** 93
Model-based reasoning
Fault diagnosis, Hydraulic systems **7,** 127
Modelling
Heuristics, Relational calculus, Data dictionary, Knowledge base, Expert system, Maintenance, Design, Database, Database management system **2,** 14
Modifiers
Connectives, Computational reasoning, Logic programming, Fuzzy logic, Qualifiers **4,** 52
Connectives, Computational reasoning, Fuzzy logic, 1st-order fuzzy logic, Terms, Predicates, Qualifiers, Quantifiers **5,** 106
Modules
Knowledge representation, Knowledge sharing **7,** 49
Monitoring and control
Knowledge base, User interaction, Expert systems **4,** 165
Motion control
Procedural animation, Signal processing, Human figure animation **9,** 359
Multi-agent systems
Information Systems, Knowledge representation systems **7,** 91
Multi-processor architectures
Distributed expert systems, Autonomous mobile robots, Real-time expert systems, Production systems, Rete network **2,** 117
Multi-strata model
Automatic system generation, Intelligent information systems **10,** 363
Multiagent systems
Agent architectures, Software agents **9,** 245
Multiexpert systems
Knowledge-based design, Expert design advisors, CAD, Blackboards, Cooperative computing **5,** 41
Multifaceted architecture
User interfaces for design, Computer-supported cooperative work, Integrated, Domain-oriented, Knowledge-based design environment, Design-support systems, Coevolution of problem setting

and problem solving, Relevance to the task at hand, Reflection in action **5,** 15
Multilinear functions
Kullback-Leibler information, Continuous Boolean functions **10,** 413
Multimedia
Intelligent tutoring systems, Care-based reasoning, Indexing **9,** 491
Multimedia knowledge representation
AI and music, Hybrid systems **7,** 114
Multimodal multiagent architecture **10,** 295
Multimodal user interfaces
Wizard of Oz studies, User interfaces **6,** 267
Multiple agents
Conceptual modeling, Knowledge representation **10,** 111
Multiple agents
Information repository, Knowledge sharing **9,** 329
Multiple meta-level architecture
Problem-solving methods, Knowledge-representation language **3,** 204
Multistrategy reasoning
Knowledge engineering, Machine learning, Production rules automatic generation **9,** 509
Musical creativity
Blackboard paradigm, Cognitive musicology, Composition theory **3,** 36
Mutual belief
Planning, Conversation **7,** 265
Naive physics
Extensional/intensional descriptions, Artificial intelligence, Deduction and theorem proving, Knowledge representation formalisms and methods, Computer-aided engineering and design, Languages, Non-standard logics, Object-oriented programming **1,** 67
Natural clusters
Disjunctive cluster description, Model theory, Clustering, Knowledge-based clustering, Maximal model, Noisy data **4,** 87
Natural language
Knowledge representation, Intelligent training systems **6,** 157
Natural language dialog **7,** 279
Natural language dialogue
Problem solving, Human-machine performance **7,** 277
Natural language generation
Discourse planning, Discourse modelling **7,** 274
Natural language processing
Syntactic subcategorizations, Parting, Learning **8,** 190
Metaphor interpretation **9,** 339
Program understanding, Reverse engineering, Object-oriented legacy code, Knowledge-based systems **9,** 517
Natural language understanding
Human-computer collaboration, Human-computer dialogue, Problem solving **8,** 211
Natural types
Role types, Attributes, Characteristics, Existence, Thematic-relations hypothesis, Conceptual graphs, Semantic structures, Deep knowledge **5,** 193
Natural-language generation
Lexical choice, Paraphrases, Conceptual graphs **5,** 200
Natural-language interfaces
Interface design, Wizard of Oz studies **6,** 258
Natural-language processing
Grammar, Parsing, Knowledge representation **5,** 213
Navigation
Quadtrees, Algorithms, Geographic information systems **4,** 157
Nearest-neighbour algorithms
Genetic algorithms, Prototype control rules **7,** 142
Neat and scruffy philosophies
Intelligence systems, Conceptual analysis, Knowledge acquisition **5,** 245
Negative Instance Elimination algorithm
Candidate Elimination algorithm, Empirical/analytical/integrated learning **2,** 83
Negotiation
Conflict, Concurrent engineering, Engineering design, Design lifecycle, Process plant **9,** 207
Network
Chemical reaction, Language **10,** 199
Network-based model
Airport apron control, Simulation **10,** 225
Network-growing algorithms
Theory refinement, KBANN algorithm, Computational biology **8,** 301
Neural architecture
Expert systems, Rule-based systems **3,** 48
Neural nets
Function of similarity, Case-based reasoning **9,** 465
Neural networks
Rule extraction, Rule induction **7,** 207
Rule interpretation, Rule induction **8,** 183
Decision-tree generators **8,** 333
Fuzzy control, Numerical pattern recognition, Sig-

nal processing, Syntactic pattern recognition **8,** 359

Nodes
Knowledge base, Binary relations, Channel matrix, Entropy **3,** 17

Noisy data
Natural clusters, Disjunctive cluster description, Model theory, Clustering, Knowledge-based clustering, Maximal model **4,** 87

Non-monotonic logic
Automated reasoning, Knowledge-based software systems, Knowledge representation **3,** 131Fuzzy logic, Inference, Fidelity, Many-valued logic **9,** 483

Non-monotonic reliability
Debugging, Fault detection algorithm **2,** 185

Non-primitive places and transitions
Place invariants, Reachability trees (analysis), Scientific-community metaphors, Analysis, Colored tokens, Cumulative places, Deadlocks, Distributed intelligent systems, DIPS Petri net, Inhibition arcs, Matrix equations **5,** 295

Non-standard logics
Object-oriented programming, Naive physics, Extensional/intensional descriptions, Artificial intelligence, Deduction and theorem proving, Knowledge representation formalisms and methods, Computer-aided engineering and design, Languages **1,** 67

Nondeterministic finite automata
Recurrent neural networks, Prior knowledge, Rule insertion **8,** 313

Nonmonotonic derivation
Nute's theory of derivations, Knowledge-based systems, Inference methods **3,** 28

Nonmonotonic knowledge bases
Integrity, Rule checking **9,** 301

Normal forms
Logic programming, Expert systems, Knowledge bases, Deductive databases, Knowledge-based systems, Knowledge systems design **2,** 147

Numerical and object modelling
Machine learning, Design reuse, Synthesis **9,** 183

Numerical pattern recognition
Fuzzy control, Neural networks, Signal processing, Syntactic pattern recognition **8,** 359

Nute's theory of derivations
Knowledge-based systems, Inference methods, Nonmonotonic derivation **3,** 28

Object orientation
Messaging, Truth maintenance, Consistency maintenance, Inheritance graph, (Symbolic) description, Abstraction mechanism, Specification, Selection, Engineering design, Knowledge representation, Taxonomic reasoning, Property inheritance **2,** 178
User interface, Speech **6,** 24

Object-oriented
Prolog, Cooperating knowledge-based systems, Cooperative problem solving **5,** 125

Object-oriented information systems
Engineering design, Property descriptions, Information modelling, Extensible organization **8,** 279

Object-oriented interface
Selection, Recognition, Agent **10,** 305

Object-oriented legacy code
Knowledge-based systems, Natural language processing, Program understanding, Reverse engineering **9,** 517

Object-oriented programming
Naive physics, Extensional/intensional descriptions, Artificial intelligence, Deduction and theorem proving, Knowledge representation formalisms and methods, Computer-aided engineering and design, Languages, Non-standard logics **1,** 67
Software engineering, Knowledge engineering, Explanation based learning, Heuristic classification, Meta-knowledge **2,** 133
Logic programming, Artificial intelligence **7,** 66
Specification, Verification, Knowledge-based systems, Logic programming **10,** 351

Object-oriented systems
Problem solving, Science **7,** 135

Ocular artefacts
Electroencephalograms, Intelligent signal processing **8,** 164

Open information systems
Distributed problem solving, InferEnce control mechanisms **8,** 235

Optimal solution search
Hypothetical reasoning, Predicate logic **9,** 163

Optimization
Current Context Memory, Backtracking, Knowledge-based system, Very Large Scale Integration, Computer Aided Design, Prolog **2,** 72

1st-order fuzzy logic
Terms, Predicates, Qualifiers, Quantifiers, Modifiers, Connectives, Computational reasoning, Fuzzy logic **5,** 106

Organization
Planning, Strategies, Problem-solving processes, Cognitive psychology, Assistance systems, Artifi-

cial intelligence, Design **5,** 92

Organizational perspectives
Manufacturing, Innovation, Human perspectives **5,** 149

Outsider agent
Divergent thinking, Information retrieval **9,** 377

Papaya
Hawaii, Management expert system, System design, Bulletin boards, Crop management **3,** 163

Paper knowledge base
Knowledge representation, Reasoning strategies, Expert system, WIESC, SERPES, WADNES, WIESSE **1,** 153

Parallel algorithms
Combinatorial optimization, Travelling salesperson problem **7,** 169

Parallel computers
Artificial intelligence, Knowledge-oriented systems, Semantic networks **1,** 259

Parallel processing
Rule-based expert system, Rule based partitioning assignment, Parameter allocation, Input/output dependence, Indeterminacy, Interactive application, Real-time application, Generalized neural network, Competition **2,** 27
Graph reduction, Production systems, ALICE system **8,** 155

Parallel search
Heuristic search, Combinatorial optization, Graph coloring, Machine learning **9,** 3

Parameter allocation
Input/output dependence, Indeterminacy, Interactive application, Real-time application, Generalized neural network, Competition, Parallel processing, Rule-based expert system, Rule based partitioning assignment **2,** 27

Parametrical notion of movement
Laban concepts, Hierarchy of choreographic tasks **3,** 42

Paramodulation
Converter, Lisp, Rule-based program translator **1,** 90

Paraphrases
Conceptual graphs, Natural-language generation, Lexical choice **5,** 200

Parlog
Logic programming, Deductive databases, Prolog **1,** 188

Parsing
Knowledge representation, Natural-language processing, Grammar **5,** 213
Natural language processing, Syntactic subcategorizations, Learning **8,** 190

Participatory theater
Agentsheets, Direct-manipulation, Delegation **9,** 351

Pattern classifier
Artificial neural networks, Fractal **10,** 177

Pattern generation
Structural recognition, Machine learning, Grammatical inference, Design description, Pattern recognition **1,** 78

Pattern recognition
Hypothesize-and-verify, Knowledge-based system, Chromosome analysis **1,** 43
Pattern generation, Structural recognition, Machine learning, Grammatical inference, Design description **1,** 78

PDP system
Knowledge-rich, Human memory, Representations, Binding, Memory **1,** 143

Perception
Computer vision, Pictures, Human-computer interaction, Knowledge representation **1,** 105

Perceptrons
Learning, Induction, Knowledge acquisition, Valiant's framework **2,** 52

Petri nets
Invariants analysis, Reachability tree analysis, Expert system **4,** 144
Requirements analysis, Information systems **6,** 165
Reachability trees, Heuristics **6,** 174
Constrained resource programming, Constraint logic programming, Logic-based knowledge representation **10,** 71

Pharmaceutical drugs
System architecture, Design exploration, Reason maintenance, Blackboard control, Design support **5,** 31

Phenomenological equivalence
Design phenomena, Computer-based design assistants, Designing, Design knowledge **5,** 3

Pictures
Human-computer interaction, Knowledge representation, Perception, Computer vision **1,** 105

Place invariants
Reachability trees (analysis), Scientific-community metaphors, Analysis, Colored tokens, Cumulative places, Deadlocks, Distributed intelligent systems, DIPS Petri net, Inhibition arcs, Matrix equations, Non-primitive places and transitions **5,** 295

Planning
Strategies, Problem-solving processes, Cognitive

psychology, Assistance systems, Artificial intelligence, Design, Organization **5,** 92
Intentions, Cooperative dialogue **6,** 67
Interactions, Truth-maintenance systems **6,** 95
Mutual belief, Conversation **7,** 265
Data exploration, Artificial intelligence **10,** 265

Planning system
Temporal planning, Autonomous agent, Artificial intelligence, Knowledge representation **2,** 210

Plans
Human-computer interaction, Discourse **7,** 268

Predicate logic
Hypothetical reasoning **6,** 87
Optimal solution search, Hypothetical reasoning **9,** 163

Predicates
Qualifiers, Quantifiers, Modifiers, Connectives, Computational reasoning, Fuzzy logic, 1st-order fuzzy logic, Terms **5,** 106
Computational reasoning, Fuzzy clausal logic, Fuzzy theorem prover, Qualifiers **8,** 174

Preliminary engineering
Knowledge representation, Model based reasoning **7,** 161

Prior knowledge
Recurrent neural networks, Rule insertion, Nondeterministic finite automata **8,** 313

Probabilistic reasoning
Maximum entropy, Reasoning with incomplete information, Probability, Reasoning under uncertainty **8,** 249

Probabilistic models
Diagnostic expert systems, Certainty factor models **7,** 17

Probabilistic reasoning
Route planning, Uncertainty management **9,** 223

Probability
Probabilistic reasoning, Maximum entropy, Reasoning with incomplete information, Reasoning under uncertainty **8,** 249
Causal networks, Maximum Entropy, Reasoning under uncertainty, Incomplete information **10,** 213

Probability distribution
Expert systems, Knowledge integration **3,** 7

Probability values
Knowledge base, Expert, Corrective action, Expert systems, Knowledge acquisition **1,** 114

Problem decomposition
Model building, Problem solving **6,** 38

Problem identification
Design knowledge capture, Knowledge-decomposition scheme **4,** 35

Problem solvers
Front ends, User interface **6,** 11

Problem solving
Model building, Problem decomposition **6,** 38
Cooperation, Distributed systems **6,** 77
Object-oriented systems, Science **7,** 135
Natural language dialogue, Human-machine performance **7,** 277
Human-computer collaboration, Human-computer dialogue, Natural language understanding **8,** 211
Consensus making, Decision support systems **10,** 59

Problem solving methods
Knowledge representation, Intelligent CAD systems **7,** 154

Problem-solving methods
Knowledge-representation language, Multiple meta-level architecture **3,** 204

Problem-solving processes
Cognitive psychology, Assistance systems, Artificial intelligence, Design, Organization, Planning, Strategies **5,** 92

Procedural animation
Signal processing, Human figure animation, Motion control **9,** 359

Process constraints
Knowledge fault diagnosis, Chemical processing industry, Expert systems, Empirical knowledge, Causal models **3,** 32

Process monitoring
Behavioural modelling, Rule based diagnosis, Event-driven simulation **9,** 525

Process plans
Expert systems, Knowledge bases **5,** 269

Process plant
Negotiation, Conflict, Concurrent engineering, Engineering design, Design lifecycle **9,** 207

Product-liability claim evaluation
Expert systems, Settlement decisions **7,** 37

Production rules automatic generation
Multistrategy reasoning, Knowledge engineering, Machine learning **9,** 509

Production systems
Rete network, Multi-processor architectures, Distributed expert systems, Autonomous mobile robots, Real-time expert systems **2,** 117
Content-addressable memory, Associative match-

ing **8,** 14
Parallel processing, Graph reduction, ALICE system **8,** 155
Program synthesis
Declarative programming, Knowledge bases, Programming environments **4,** 4
Program understanding
Reverse engineering, Object-oriented legacy code, Knowledge-based systems, Natural language processing **9,** 517
Programmable design environments
Applications. Complexity **8,** 135
Programming environment
RUBRIC, Software engineering, Software tools, Information systems **1,** 227
IPSE, Knowledge base, User interaction, Software tools **1,** 240
Programming environments
Program synthesis, Declarative programming, Knowledge bases **4,** 4
Project management
Management information systems, Transaction processing systems, Expert systems **3,** 170
Quality control, Quality factors, Quality planning **8,** 269
Prolog
Logic programming, Database management system, Fourth generation language, Fifth generation language, Knowledge based system, Expert system **1,** 24
Parlog, Logic programming, Deductive databases **1,** 188
Optimization, Current Context Memory, Backtracking, Knowledge-based system, Very Large Scale Integration, Computer Aided Design **2,** 72
Databases, Evaluational and non-evaluational approaches, Indexing, Knowledge engineering **2,** 203
Representation, Data partitioning, Distributable clusters, Knowledge-base, Logic systems, Matrix model **3,** 230
Rule-based systems, Resource allocation, Expert systems, Scheduling, Backtracking strategy **4,** 215
Cooperating knowledge-based systems, Cooperative problem solving, Object-oriented **5,** 125
Measurement systems, Blackboard architectures **9,** 233
Property descriptions
Object-oriented information systems, Engineering design, Information modelling, Extensible organization **8,** 279
Property inheritance
Object orientation, Messaging, Truth maintenance, Consistency maintenance, Inheritance graph, (Symbolic) description, Abstraction mechanism, Specification, Selection, Engineering design, Knowledge representation, Taxonomic reasoning **2,** 178
Prototype control rules
Genetic algorithms, Nearest neighbour algorithms **7,** 142
Psychology-based model
Creative systems, IPC-model, Discovery **9,** 385
Quadtrees
Algorithms, Geographic information systems, Navigation **4,** 157
Qualifiers
Modifiers, Connectives, Computational reasoning, Logic programming, Fuzzy logic **4,** 52
Quantifiers, Modifiers, Connectives, Computational reasoning, Fuzzy logic, 1st-order fuzzy logic, Terms, Predicates **5,** 106
Computational reasoning, Fuzzy clausal logic, Fuzzy theorem prover, Predicates **8,** 174
Qualitative physics
Spatial reasoning, Robot programming **2,** 37
Qualitative representation
Linguistic atom, Compatibility cloud **10,** 431
Quality control
Quality factors, Quality planning, Project management **8,** 269
Quality factors
Quality control, Quality planning, Project management **8,** 269
Quality planning
Quality control, Quality factors, Project management **8,** 269
Quantifiers
Modifiers, Connectives, Computational reasoning, Fuzzy logic, 1st-order fuzzy logic, Terms, Predicates, Qualifiers **5,** 106
Question-asking
Horn **10,** 81
Radiotherapy treatment planning
Software agent, Interface agent, Training system **10,** 161
Rapid prototyping
Frames, Knowledge-based software system, Artificial intelligence, Software engineering **2,** 239
RBFS
VEGAN, KET, Knowledge representation,

Knowledge acquisition, Expert system, Knowledge engineer, Domain knowledge, Languages **1,** 301

Reachability tree analysis
Expert system, Petri nets, Invariants analysis **4,** 144

Reachability trees
Petri nets, Heuristics **6,** 174

Reachability trees (analysis)
Scientific-community metaphors, Analysis, Colored tokens, Cumulative places, Deadlocks, Distributed intelligent systems, DIPS Petri net, Inhibition arcs, Matrix equations, Non-primitive places and transitions, Place invariants **5,** 295

Real-time application
Generalized neural network, Competition, Parallel processing, Rule-based expert system, Rule based partitioning assignment, Parameter allocation, Input/output dependence, Indeterminacy, Interactive application **2,** 27

Real-time embedded system
Knowledge-based techniques, Knowledge-based components, Abstract knowledge types, Blackboard architecture, Software engineering principles, Ada **9,** 417

Real-time expert systems
Production systems, Rete network, Multi-processor architectures, Distributed expert systems, Autonomous mobile robots **2,** 117

Reason maintenance
Blackboard control, Design support, Pharmaceutical drugs, System architecture, Design exploration **5,** 31

Reasoning
Rule-based systems, Knowledge representation, Inference techniques, Canonical graphs **1,** 266
Bayes' theorem, Conditional probability, Belief networks, Uncertainty **4,** 67
Inference engine, Graphs **4,** 75

Reasoning strategies
Expert system, WIESC, SERPES, WADNES, WIESSE, Paper knowledge base, Knowledge representation **1,** 153

Reasoning systems
Expert systems, Hermeneutics **3,** 25

Reasoning under uncertainty
Probabilistic reasoning, Maximum entropy, Reasoning with incomplete information, Probability **8,** 249
Incomplete information, Probability, Causal networks, Maximum Entropy **10,** 213

Reasoning with incomplete information
Probabilistic reasoning, Maximum entropy, Probability, Reasoning under uncertainty **8,** 249

Recognition
Agent, Object-oriented interface, Selection **10,** 305

Recurrent neural networks
Prior knowledge, Rule insertion, Nondeterministic finite automata **8,** 313

Redesign
Reuse, Compositional architectures, Generic task models **9,** 105

Refinement
Knowledge bases, Knowledge acquisition **4,** 231

Reflection in action
Multifaceted architecture, User interfaces for design, Computer-supported cooperative work, Integrated, Domain-oriented, Knowledge-based design environment, Design-support systems, Coevolution of problem setting and problem solving, Relevance to the task at hand **5,** 15

Regulation text analysis
Text structuring, Knowledge acquisition, Deontic knowledge base **3,** 108

Relational calculus
Data dictionary, Knowledge base, Expert system, Maintenance, Design, Database, Database management system, Modelling, Heuristics **2,** 14

Relevance to the task at hand
Reflection in action, Multifaceted architecture, User interfaces for design, Computer-supported cooperative work, Integrated, Domain-oriented, Knowledge-based design environment, Design-support systems, Coevolution of problem setting and problem solving **5,** 15

Repair
Speech, Dialog, Feedback, Agents, Telephony **8,** 143

Representation
Data partitioning, Distributable clusters, Knowledge-base, Logic systems, Matrix model, Prolog **3,** 230

Representations
Binding, Memory, PDP system, Knowledge-rich, Human memory **1,** 143

Requirements analysis
Information systems, Petri nets **6,** 165

Requirements engineering
Knowledge base, Systems analyst, Model primitives, Domain knowledge, Requirements specifica-

tion **1,** 179
Languages, ERAE, Knowledge engineering **1,** 211
Requirements specification
Requirements engineering, Knowledge base, Systems analyst, Model primitives, Domain knowledge **1,** 179
Resource allocation
Expert systems, Scheduling, Backtracking strategy, Prolog, Rule-based systems **4,** 215
Restoration strategies
Bulk power systems restoration **9,** 15
Rete network
Multi-processor architectures, Distributed expert systems, Autonomous mobile robots, Real-time expert systems, Production systems **2,** 117
Retrieval
Adaptation, Software design, Case-based reasoning **9,** 127
Reusability
Model fragment libraries, Assumption management, Engineering modelling **9,** 119
Functional fixedness **9,** 137
Reuse
Compositional architectures, Generic task models, Redesign **9,** 105
Reverse engineering
Object-oriented legacy code, Knowledge-based systems, Natural language processing, Program understanding **9,** 517
Rhetorical structure theory
Discourse modelling, Explanations, Design plans **9,** 23
Robot programming
Qualitative physics, Spatial reasoning **2,** 37
Role types
Attributes, Characteristics, Existence, Thematic-relations hypothesis, Conceptual graphs, Semantic structures, Deep knowledge, Natural types **5,** 193
Route planning
Uncertainty management, Probabilistic reasoning **9,** 223
RUBRIC
Software engineering, Software tools, Information systems, Programming environment **1,** 227
Rule base
Logic rules, Horn clauses, Knowledge-base management, Knowledge-base architecture **4,** 82
Inference machine, Frames, Slots, Backtracking **4,** 131
Rule base verification
Binary encoded incidence matrices **8,** 201
Rule based diagnosis
Event-driven simulation, Process monitoring, Behavioural modelling **9,** 525
Rule Based Frame System
Knowledge engineering, Knowledge acquisition, Meronymic inheritance, Taxonomy **2,** 219
Rule based partitioning assignment
Parameter allocation, Input/output dependence, Indeterminacy, Interactive application, Real-time application, Generalized neural network, Competition, Parallel processing, Rule-based expert system **2,** 27
Rule checking
Nonmonotonic knowledge bases, Integrity **9,** 301
Rule extraction
Neural networks, Rule induction **7,** 207
Fuzzy neural networks, Rule refinement, Knowledge insertion, Inferencing **8,** 373
Rule induction
Neural networks, Rule extraction **7,** 207
Neural networks, Rule interpretation **8,** 183
Rule insertion
Recurrent neural networks, Prior knowledge, Nondeterministic finite automata **8,** 313
Rule interpretation
Neural networks, Rule induction **8,** 183
Rule refinement
Fuzzy neural networks, Rule extraction, Knowledge insertion, Inferencing **8,** 373
Rule-based expert system
Rule based partitioning assignment, Parameter allocation, Input/output dependence, Indeterminacy, Interactive application, Real-time application, Generalized neural network, Competition, Parallel processing **2,** 27
Machine vision, Fire detection **9,** 531
Rule-based machine diagnosis
Architecture, Expert system **2,** 228
Rule-based program translator
Paramodulation, Converter, Lisp **1,** 90
Rule-based programs
Logic programming, Knowledge-based systems, Explanation, Arguments **4,** 177
Rule-based reasoning
Case-based reasoning, Cooperative reasoning **6,** 103
Rule-based systems
Knowledge representation, Inference techniques,

Canonical graphs, Reasoning **1,** 266
Neural architecture, Expert systems **3,** 48
Resource allocation, Expert systems, Scheduling, Backtracking strategy, Prolog **4,** 215
Knowledge acquisition, Expert systems, Methods, Uncertainty handling **4,** 225
Knowledge organization, Explanation-based learning **7,** 177

Scale-type
Invariance, Scientific discovery, Knowledge discovery, First principle **10,** 403

Scheduling
Backtracking strategy, Prolog, Rule-based systems, Resource allocation, Expert systems **4,** 215
Constraints, Heuristic search **10,** 169

Science
Object-oriented Systems, Problem solving **7,** 135

Scientific discovery
Knowledge discovery, First principle, Scale-type, Invariance **10,** 403

Scientific-community metaphors
Analysis, Colored tokens, Cumulative places, Deadlocks, Distributed intelligent systems, DIPS Petri net, Inhibition arcs, Matrix equations, Non-primitive places and transitions, Place invariants, Reachability trees (analysis) **5,** 295

Selection
Engineering design, Knowledge representation, Taxonomic reasoning, Property inheritance, Object orientation, Messaging, Truth maintenance, Consistency maintenance, Inheritance graph, (Symbolic) description, Abstraction mechanism, Specification **2,** 178
Recognition, Agent, Object-oriented interface **10,** 305

Semantic interoperability
Context exchange. Lattice theory **8,** 5

Semantic networks
Knowledge-based systems, Knowledge representation, Knowledge manipulation engines, Intelligent file stores, Associative memory, Declarative languages **1,** 166
Parallel computers, Artificial intelligence, Knowledge-oriented systems **1,** 259

Semantic structures
Conceptual graphs, Lexical representations **5,** 173
Deep knowledge, Natural types, Role types, Attributes, Characteristics, Existence, Thematic-relations hypothesis, Conceptual graphs **5,** 193

Semi-automatic analysis
Artificial intelligence, Knowledge-based system **1,** 292

SERPES
WADNES, WIESSE, Paper knowledge base, Knowledge representation, Reasoning strategies, Expert system, WIESC **1,** 153

Set theory
Truth maintenance, Equation solving **5,** 289

Settlement decisions
Expert systems, Product-liability claim evaluation **7,** 37

Shallow/deep knowledge
Expert / conceptual knowledge, Inductive shell, Conceptual programming **4,** 27

Ship structural design
Complex object-based knowledge representation, Complex object-based inference mechanism, Hypothesis-object **10,** 121

Sign-language recognition
Gesture description, Chereme **10,** 287

Signal processing
Fuzzy control, Neural networks, Numerical pattern recognition, Syntactic pattern recognition **8,** 359
Human figure animation, Motion control, Procedural animation **9,** 359

Simulation
Front ends **6,** 17
Collaboration, Communication **8,** 105
Case-based reasoning, Statistical modeling **9,** 409
Network-based model, Airport apron control **10,** 225

Situated action
Knowledge engineering, Development perspectives **7,** 271

Situation assessment
Situation prediction, Intelligence analysis **10,** 87

Situation prediction
Intelligence analysis, Situation assessment **10,** 87

Skill-based expertise
Symbolic expert systems, Commonsense intelligence, Tacit knowledge **10,** 147

Slots
Backtracking, Rule base, Inference machine, Frames **4,** 131

Small businesses
Systems development, Evaluation methods **7,** 27

Software agents
Multiagent systems, Agent architectures **9,** 245

Software configuration management
Version control, Heuristic control knowledge **9,** 61
Software crisis
Specification, Verification, Validation, Machine learning **2,** 128
Software design
Assessment, MDSE advisor, Software tools, Knowledge-based techniques **1,** 235
Case-based reasoning, Retrieval, Adaptation **9,** 127
Software development
Enabling technologies, Knowledge-based programming, Artificial intelligence **1,** 221
Software engineering
Software tools, Information systems, Programming environment, RUBRIC **1,** 227
Knowledge engineering, Explanation based learning, Heuristic classification, Meta-knowledge, Object-oriented programming **2,** 133
Rapid prototyping, Frames, Knowledge-based software system, Artificial intelligence **2,** 239
Software engineering principles
Ada, Real-time embedded system, Knowledge-based techniques, Knowledge-based components, Abstract knowledge types, Blackboard architecture **9,** 417
Software environment
Databases, DAIDA, Concept Base, KBMS, Knowledge base **1,** 197
Software tools
Information systems, Programming environment, RUBRIC, Software engineering **1,** 227
Knowledge-based techniques, Software design, Assessment, MDSE advisor **1,** 235
Programming environment, IPSE, Knowledge base, User interaction **1,** 240
Software agent
Interface agent, Training system, Radiotherapy treatment planning **10,** 161
Spatial reasoning
Robot programming, Qualitative physics **2,** 37
Specification
Verification, Validation, Machine learning, Software crisis **2,** 128
Selection, Engineering design, Knowledge representation, Taxonomic reasoning, Property inheritance, Object orientation, Messaging, Truth maintenance, Consistency maintenance, Inheritance graph, (Symbolic) description, Abstraction mechanism **2,** 178
Verification, Knowledge-based systems, Logic programming, Object-oriented programming **10,** 351
Knowledge-based systems, System development **4,** 186
Spectra
Mineral identification, Expert system **2,** 5
Speech
User interface, Object orientation **6,** 24
Dialog, Feedback, Repair, Agents, Telephony **8,** 143
Statistical analysis
GLIM: Prolog, APES, Evaluator, Knowledge-based front end, Knowledge base, Logic programming **1,** 173
Statistical database
Knowledge acquisition, Implementation, Knowledge-based system, Database technology **1,** 279
Statistical modeling
Simulation, Case-based reasoning **9,** 409
Strategic explanation
Expert systems, Databases, Commonsense reasoning, Information retrieval **1,** 32
Strategic knowledge
Creativity support, Creative design **10,** 29
Strategies
Problem-solving processes, Cognitive psychology, Assistance systems, Artificial intelligence, Design, Organization, Planning **5,** 92
Structural engineering
Memory-based exploration, Computer-aided design **9,** 151
Structural recognition
Machine learning, Grammatical inference, Design description, Pattern recognition, Pattern generation **1,** 78
Supertags
Dependency, Text simplification **10,** 183
(Symbolic) description
Abstraction mechanism, Specification, Selection, Engineering design, Knowledge representation, Taxonomic reasoning, Property inheritance, Object orientation, Messaging, Truth maintenance, Consistency maintenance, Inheritance graph **2,** 178
Symbolic expert systems
Commonsense intelligence, Tacit knowledge, Skill-based expertise **10,** 147
Syntactic pattern recognition
Hybrid knowledge-base architecture, Intelligent signal inspection systems **8,** 21
Syntactic subcategorizations
Natural language processing, Parsing, Learning

8, 190

Synthesis
Numerical and object modelling, Machine learning, Design reuse **9,** 183

System architecture
Design exploration, Reason maintenance, Blackboard control, Design support, Pharmaceutical drugs **5,** 31

System design
Bulletin boards, Crop management, Papaya, Hawaii, Management expert system **3,** 163

System development
Specification, Knowledge-based systems **4,** 186
Tools, Tool selection, Expert systems **5,** 137

System validation
Expert system, Construction claims, Knowledge acquisition, Knowledge representation, Certainty factors **2,** 158

Systems analyst
Model primitives, Domain knowledge, Requirements specification, Requirements engineering, Knowledge base **1,** 179

Systems development
Evaluation methods, Small businesses **7,** 27

Tacit knowledge
Skill-based expertise, Symbolic expert systems, Commonsense intelligence **10,** 147

Tailoring
User interfaces, Design rationale **7,** 253

Task allocation
Electronic coordination mechanisms **10,** 325

Task classification
Market trends, Computer-assisted production, Expert systems, Knowledge-based systems **2,** 249

Taxonomic reasoning
Property inheritance, Object orientation, Messaging, Truth maintenance, Consistency maintenance, Inheritance graph, (Symbolic) description, Abstraction mechanism, Specification, Selection, Engineering design, Knowledge representation **2,** 178

Taxonomy
Rule Based Frame System, Knowledge engineering, Knowledge acquisition, Meronymic inheritance **2,** 219

Technology transfer
Expert systems, Transfer management framework **5,** 258

Telephony
Speech, Dialog, Feedback, Repair, Agents **8,** 143

Temporal knowledge representation
Conceptual graph theory **4,** 197

Temporal planning
Autonomous agent, Artificial intelligence, Knowledge representation, Planning system **2,** 210

Temporal reasoning
Tesseral addressing, Integration of KBS and GIS **9,** 287

Temporal-knowledge representation
Discourse, Conceptual graphs **5,** 183

Terms
Predicates, Qualifiers, Quantifiers, Modifiers, Connectives, Computational reasoning, Fuzzy logic, 1st-order fuzzy logic **5,** 106

Tesseral addressing
Integration of KBS and GIS, Temporal reasoning **9,** 287

Text simplification
Supertags, Dependency **10,** 183

Text structuring
Knowledge acquisition, Deontic knowledge base, Regulation text analysis **3,** 108

Thematic-relations hypothesis
Conceptual graphs, Semantic structures, Deep knowledge, Natural types, Role types, Attributes, Characteristics, Existence **5,** 193

Theory refinement
Network-growing algorithms, KBANN algorithm, Computational biology **8,** 301

Thought process record
KJ editor, Creative work support **10,** 43

Time range reasoning
Microprocessor systems diagnosis **9,** 173

Tool selection
Expert systems, System development, Tools **5,** 137

Toolkit
Architecture, Building methodology, Expert systems **1,** 132

Tools
Tool selection, Expert systems, System development **5,** 137

Top-down hierarchical planning
Automated graphics generation, Knowledge-based user interfaces **10,** 275

Training system
Radiotherapy treatment planning, Software agent, Interface agent **10,** 161

Transaction processing systems
Expert systems, Project management, Management information systems **3,** 170
Transfer management framework
Technology transfer, Expert systems **5,** 258
Transformations
Expert systems, Databases, Data, Boolean algebra **3,** 21
Travelling salesperson problem
Combinatorial optimization, Parallel algorithms **7,** 169
Truth maintenance
Consistency maintenance, Inheritance graph, (Symbolic) description, Abstraction mechanism, Specification, Selection, Engineering design, Knowledge representation, Taxonomic reasoning, Property inheritance, Object orientation, Messaging **2,** 178
Equation solving, Set theory **5,** 289
Truth-maintenance systems
Planning, Interactions **6,** 95
Type hierarchy
Knowledge representation, Conceptual graphs, Metaphor **5,** 223
Uncertainty
Reasoning, Bayes' theorem, Conditional probability, Belief networks **4,** 67
Uncertainty handling
Rule-based systems, Knowledge acquisition, Expert systems, Methods **4,** 225
Uncertainty management
Probabilistic reasoning, Route planning **9,** 223
Urban planning
Knowledge-based systems, Decision support systems, Artificial neural networks **10,** 103
Usability
Adaptive hypermedia, Intelligent interfaces **10,** 311
Usability testing
User modelling, User knowledge, Human-computer interaction, Errors, Error classification **3,** 67
Usage profiles
Adaptive interfaces, Customizability **6,** 230
User interaction
Software tools, Programming environment, IPSE, Knowledge base **1,** 240
Expert systems, Monitoring and control, Knowledge base **4,** 165
User interface
Knowledge-based front-end, Interface separability, Back-end manager **3,** 225
Computational physics, Decision support **6,** 3
Front ends, Problem solvers **6,** 11
Speech, Object orientation **6,** 24
Contextual design, Front ends **6,** 31
User models, Adaptive interfaces **6,** 220
Multimodal user interfaces, Wizard of Oz studies **6,** 267
User interfaces
Tailoring, Design rationale **7,** 253
User interfaces for design
Computer-supported cooperative work, Integrated, Domain-oriented, Knowledge-based design environment, Design-support systems, Coevolution of problem setting and problem solving, Relevance to the task at hand, Reflection in action, Multifaceted architecture **5,** 15
User knowledge
Human-computer interaction, Errors, Error classification, Usability testing, User modelling **3,** 67
User modelling
User knowledge, Human-computer interaction, Errors, Error classification, Usability testing **3,** 67
User models
Adaptive interfaces, Intelligent interfaces **6,** 197
User interfaces, Adaptive interfaces **6,** 220
Adaptive interfaces, Intelligent user interfaces **6,** 239
User profile
